

APPENDIX A
NOTICE OF PREPARATION AND COMMENTS

CITY OF STOCKTON
NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT

Date: January 29, 2020

To: Responsible and Trustee Agencies, Organizations, and Interested Parties

From: City of Stockton, Community Development Department (Lead Agency)

SUBJECT: ENVIRONMENTAL IMPACT REPORT FOR THE SANCHEZ-HOGGAN ANNEXATION PROJECT

The City of Stockton intends to prepare an Environmental Impact Report (EIR) for the Sanchez-Hoggan Annexation Project (Hereafter "Project") pursuant to Section 15021 of the California Environmental Quality Act (CEQA) Guidelines. Section 15082 of the CEQA Guidelines requires the City to prepare this Notice of Preparation (NOP) to provide to the Office of Planning and Research, responsible and trustee agencies, and other interested parties with sufficient information describing the Project and its potential environmental effects. The City made the determination to prepare an EIR following preliminary review of the Project. Pursuant to CEQA Guidelines Section 15063(a), because an EIR is needed an initial study has not been prepared. Probable environmental effects of the Project are described in the attached Project summary.

As specified by the CEQA Guidelines, the NOP will be circulated for a 30-day review period. The comment period runs from Thursday, January 30, 2020, to Friday, February 28, 2020. The City welcomes public input during the review period. In the event the City has not received either a response or a well-justified request for additional time by a responsible agency by the end of the review period, the City may presume that the responsible agency has no response (CEQA Guidelines Section 15082[b][2]).

A scoping meeting for this project will be held from 6:00 p.m. to 7:30 p.m. on Wednesday, February 19, 2020 at the Cesar Chavez Central Library located at 605 N El Dorado St, Stockton, CA 95202.

PROJECT TITLE: Sanchez-Hoggan Annexation Project
CITY PROJECT FILE #: P19-0691

PROJECT DESCRIPTION/LOCATION: The project site, consisting of two properties, is in the unincorporated area of San Joaquin County, adjacent to the southeastern limits of the City of Stockton (Figures 1 through 7). The 149.01-acre Sanchez property, consisting of Assessor's Parcel Number (APN) 181-100-09, is located at the northwest corner of the intersection of Arch Road and Austin Road. The 20.76-acre Hoggan property, consisting of APN 179-200-27, is located between North Littlejohns Creek and existing development along the north side of Gold River Lane. The project will require San Joaquin LAFCO approval of annexation to the City, and City of Stockton approvals of Prezoning and a Tentative Parcel Map.

If you have any questions regarding this matter or would like to submit comments on behalf of your agency/organization or as an individual, please submit your comments to the City's Project Manager at:

City of Stockton
Community Development Department
Attention: Matt Diaz,
345 N. El Dorado Street
Stockton, CA 95202
(209-937-8598 or Matt.Diaz@stocktonca.gov.)

ATTACHMENT A

NOTICE OF PREPARATION FOR AN ENVIRONMENTAL IMPACT REPORT FOR THE SANCHEZ-HOGGAN ANNEXATION PROJECT

A.1 Project Location

The project site, consisting of two properties, is in the unincorporated area of San Joaquin County, adjacent to the southeastern limits of the City of Stockton (Figures 1 through 4). The 149.01-acre Sanchez property, consisting of Assessor's Parcel Number (APN) 181-100-09, is located at the northwest corner of the intersection of Arch Road and Austin Road. The 20.76-acre Hoggan property, consisting of APN 179-200-27, is located between North Littlejohns Creek and existing development along the north side of Gold River Lane.

The Sanchez property is shown on the Stockton East U.S. Geological Survey 7.5-minute quadrangle map within Section 27 of Township 1 North, Range 7 East, Mt. Diablo Baseline and Meridian. The Hoggan property is shown on the same map within Sections 59 and 60 of the Campo de los Franceses land grant of Township 1 North, Range 7 East, Mt. Diablo Baseline and Meridian. The approximate latitude of the project site is 37° 54' 43" North, and the approximate longitude is 121° 12' 09" West.

A.2 Existing Conditions

The Sanchez property is currently in agricultural use, and the Hoggan property is vacant. Weber Slough, a channelized stream, traverses the center of the Sanchez property from east to west. North Littlejohns Creek forms the northern boundary of the Hoggan property. Both streams are tributary to French Camp Slough. The project site is located southeast of the City of Stockton in an area that has been designated in the City of Stockton's Envision Stockton 2040 General Plan for industrial development and that has been developing progressively for those purposes over time.

The adjacent Norcal Logistics Center (P12-110) consists of an approved industrial subdivision of approximately 325-acres located between Arch Road and Mariposa Road within the City limits (SCH# 2012102061). This project was the subject of an EIR certified by the City in 2015. Vesting Tentative Maps for the Norcal project have been approved by the City, with conditions.

A.3 Entitlements

The project proponent is requesting the following discretionary approvals from the City of Stockton:

- Annexation: The proposed annexation includes two parcels totaling approximately 169.77-acres. The annexation area includes APN 181-100-09, which is the 149.01-acre Sanchez property, and APN 179-200-27, which is the 20.76-acre

Hoggan property. Both parcels are within the Stockton Sphere of Influence and have been designated as Industrial by the City's 2040 General Plan. While both parcels are adjacent to the City of Stockton City limit boundary, the two properties are separated by approximately one mile.

- Prezone: The proposed prezone would convert both subject parcels from the San Joaquin County zoning designation of General Agriculture with a 40-acre minimum parcel size (AG-40) to the City of Stockton's zoning designation of Industrial, Limited (IL). As identified on Table 2-1 of the General Plan, the proposed IL is an implementing zone of the Industrial land use designation.
- Tentative Parcel Map: The project proponent proposes to subdivide the Sanchez property (APN 181-100-09) into four parcels for the purposes of future ownership or leasing purposes (Figure 5). The proposed parcels reflect the boundaries of anticipated industrial structures and onsite improvements associated with ultimate development of the 149.01-acre Sanchez property (Figure 6). The parcel map will be the basis for improvements (utilities, roadway), and the location of improvements, made to the Sanchez parcel and surrounding areas. The project would obtain utility service, including sanitary sewer and water, from existing City of Stockton lines adjacent to or near the site.
- Cancellation of Williams Act: The Sanchez parcel is currently under Williamson Act contract. This contract must be terminated either by the City or County prior to the conversion of land from agricultural use to industrial.

A.4 Project Description

The proposed project is intended to enlarge the Stockton City Limit boundary to include the proposed project parcels. The prezone and tentative parcel map would allow future industrial uses to be constructed on site. Future development of the proposed project sites would have to indicate compliance with the proposed IL zoning designation. Per Title 16 of the City of Stockton's Municipal Code, the IL designation would allow industrial construction for up 60-percent of site coverage, with building heights at a maximum of 60-feet.

Anticipated Industrial Use of the Sites

The project proponent (CT Realty) intends to develop the proposed project sites into industrial uses similar to the adjacent Norcal Logistics Industrial Center. A description of the anticipated develop is indicated below while a conceptual site plan has been included with Figure 6-7.

- *Sanchez Property (APN 181-100-09)*: The proposed Sanchez project site includes a tentative parcel map application to allow greater user flexibility (allowing different sized lots) to attract a wider range of future industrial users (Figure 6). The project proponent anticipates the Sanchez parcel to yield four industrial buildings totaling approximately 2,800,000-square feet (43-percent coverage). These industrial buildings would include warehouse, office, and distribution uses consistent with

the zoning code and surrounding existing uses. The project proponent anticipates onsite improvements to include approximately 2,900 automobile and trailer parking stalls, pedestrian walkways, lighting, landscaping, and a storm drainage detention basin. Another 7.32 acres is within a drainage corridor occupied by Weber Slough; other than drainage improvements, no development would occur within this drainage corridor.

- *Hoggan Property (APN 179-200-27)*: The project proponent anticipates the Hoggan parcel to yield approximately 300,000-square feet (33-percent coverage) of future industrial space (Figure 7). Future construction could accommodate up to 270 automobile and trailer parking stalls, pedestrian walkways, landscaping, lighting, and stormwater detention basins. The site includes a structural setback along North Littlejohns Creek and would not permit development to preserve the creek. It is anticipated that primary access to the Hoggan property would be from an extension of the existing terminus of Frontier Way located immediately south of the site. Utility service, including sewer, water and storm drainage, would be provided by the City of Stockton from existing lines south and/or east of the property. Electrical, natural gas, and communication utilities would be extended to the property from existing facilities in the area.

A.5 Issues to be Analyzed in the EIR

As noted in the Notice of Preparation (NOP), the City of Stockton has determined that an Environmental Impact Report (EIR) will be prepared for the project. The EIR, which is in preparation, will consider the potential environmental effects, mitigation measures and alternatives to the proposed industrial development as envisioned by the project applicants, and as described in the Proposed Industrial Development section below.

Concerns to be addressed in the EIR are summarized as follows:

Aesthetics and Visual Resources

The EIR will consider the size and architectural character of proposed structures and site improvements and their consistency with surrounding development and City of Stockton design standards, together with potential lighting impacts on surrounding land uses and night sky.

Agricultural Resources

Proposed industrial development will involve conversion of agricultural land to urban industrial use. The EIR will consider these concerns as well as issues related to cancellation of the existing Williamson Act contract on the Sanchez property in the context of the City's analysis of agriculture-related issues in the certified Stockton General Plan EIR (December 2018).

Air Quality

The EIR will quantify construction and operational air pollutant emissions associated with the project and their relationship to state and federal standards, exceedance of applicable emissions thresholds, carbon monoxide concentrations at nearby congested intersections, toxic air contaminants, and odors. This analysis will also consider the context of the certified Stockton General Plan EIR.

Biological Resources

The EIR will include a biological assessment of the project, including consideration of the potential impacts of proposed industrial development on habitat for special-status and migratory species, wetlands, riparian areas, stream channels, and other sensitive habitats. The analysis will consider existing and proposed conservation easement protections along the creeks as well as the mitigating effect of the project participating in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan.

Cultural Resources

The EIR will include the results of a cultural resources record search, survey of the project site, and assessment of the project, including consideration of the potential impacts of proposed industrial development on known and as yet-undiscovered historical and/or archaeological resources. The EIR will also consider Tribal Cultural Resources for compliance with the AB 52 tribal consultation. These efforts will be subject to the cultural standards outlined in the City's General Plan and Development Code.

Energy

The EIR will consider and discuss predicted energy consumption associated with the project, as well as conservation measures associated with the siting and operation of the project generally and those that would be incorporated into proposed buildings. The EIR will identify the project potential for wasteful or inefficient use of energy, if any.

Geology, Soils, and Mineral Resources

The EIR will describe the general geology of the project area, geotechnical and seismic hazards, soil quality and erosion potential, suitability of soil for development, potential project impact on accessibility of mineral resources, and potential effects on unique geological or paleontological resources.

Greenhouse Gas Emissions

The EIR will quantify and identify the significance of construction and operational GHG emissions associated with the project and the project's consistency with applicable GHG management plans, including the Stockton Climate Action Plan.

Hazards and Hazardous Materials

The EIR will document the presence or absence of documented environmental contamination on and near the project site, including potential surface soil contamination from agricultural use. Use, storage, and transportation of hazardous materials associated

with proposed industrial uses and potential for environmental contamination will be evaluated.

Hydrology and Water Quality

The EIR will describe the surface and groundwater hydrologic resources of the project site and vicinity, as well as exposure to 100-year and 200-year flooding hazards. Potential for project encroachment on North Littlejohns Creek, Weber Slough and other direct effects to surface and groundwater resources will be described, as will storm water volume and quality and conformance with adopted City of Stockton storm water quality protection and treatment standards.

Land Use, Population, and Housing

The EIR will analyze project consistency with the Stockton General Plan, zoning, and other applicable land use plans and ordinances, along with the potential direct and indirect impacts on population growth and housing needs.

Noise

The EIR will describe the existing noise environment and the potential effects of project construction and operation on sensitive land uses adjacent to and near the project. The analysis will consider noise impacts associated with industrial development, impacts of increased traffic on roadway noise, and the effects of roadway noise increases on land uses along primary project traffic routes.

Public Services and Recreation

The EIR will describe existing public service providers and providers that would be responsible for public services upon annexation of the project site to the City of Stockton. The EIR will consider the need for new or expanded facilities required for agencies responsible for fire protection, police protection, schools, and parks and recreation, and the potential impacts of addition of any new or expanded public facilities on the environment.

Transportation

The EIR will describe the location, nature and operation of existing transportation systems serving the project site and vicinity. The EIR will quantify and consider the generation of traffic from new industrial uses; impacts on traffic flow on streets and intersections in the project area; consistency with applicable transportation plans; impacts on or related to alternative travel modes, including analysis of the vehicle miles traveled impacts of the project.

Utilities

The EIR will describe existing and planned utility systems serving the project site and surrounding industrial development. The EIR will identify any necessary extension of water, wastewater, storm drainage, solid waste, and other utilities and the potential environmental impacts of constructing those improvements.

Wildfire

The EIR will document existing or potential future exposure to wildfire hazards associated with the project.

Cumulative Impacts

The EIR will consider the potential cumulative impacts of the project in all of the above-listed resource areas, based primarily on the analysis of citywide environmental effects in the recently adopted Envision Stockton General Plan 2040 EIR.

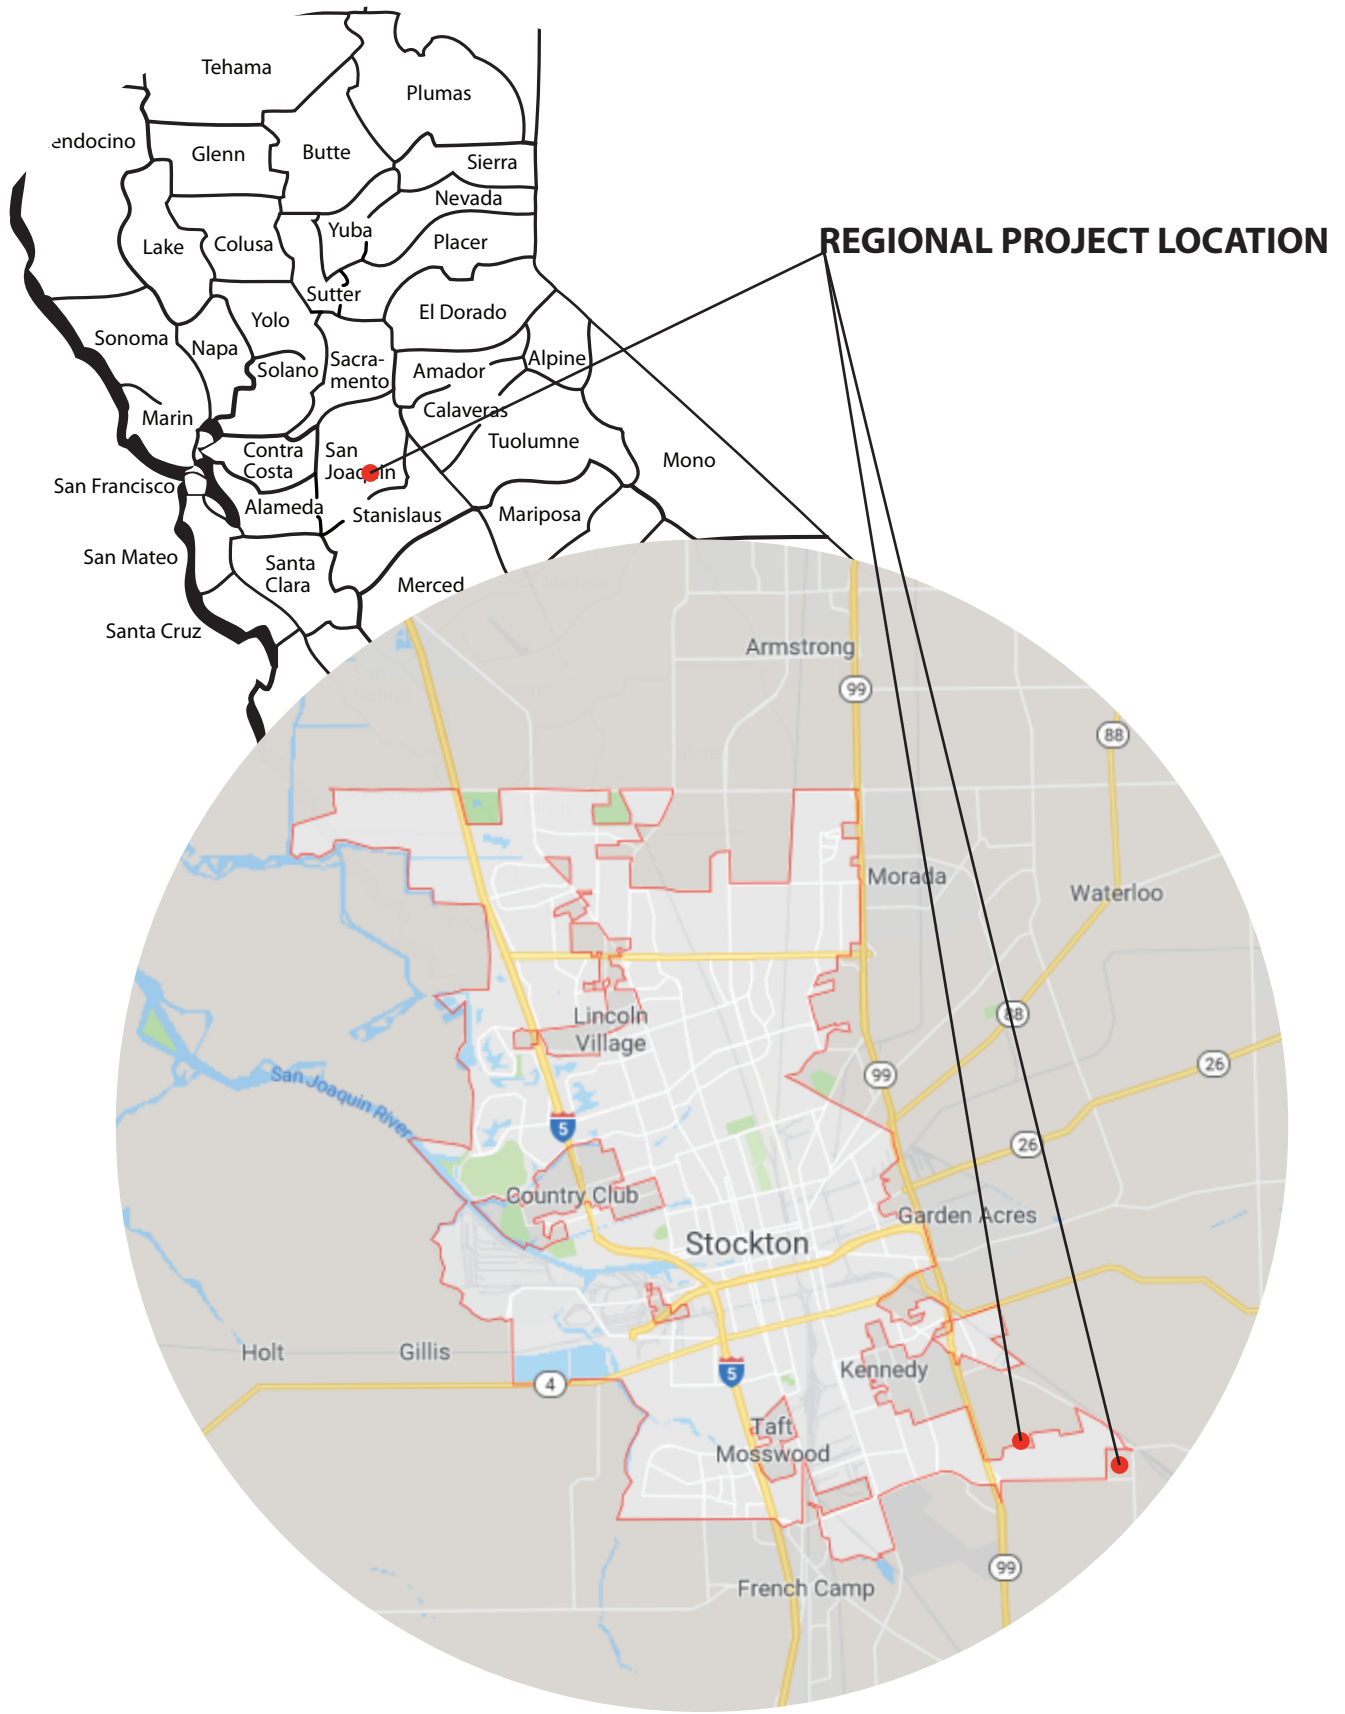

Alternatives to the Proposed Project

The EIR will evaluate the comparative environmental effects of reasonable range of alternatives to the proposed project.

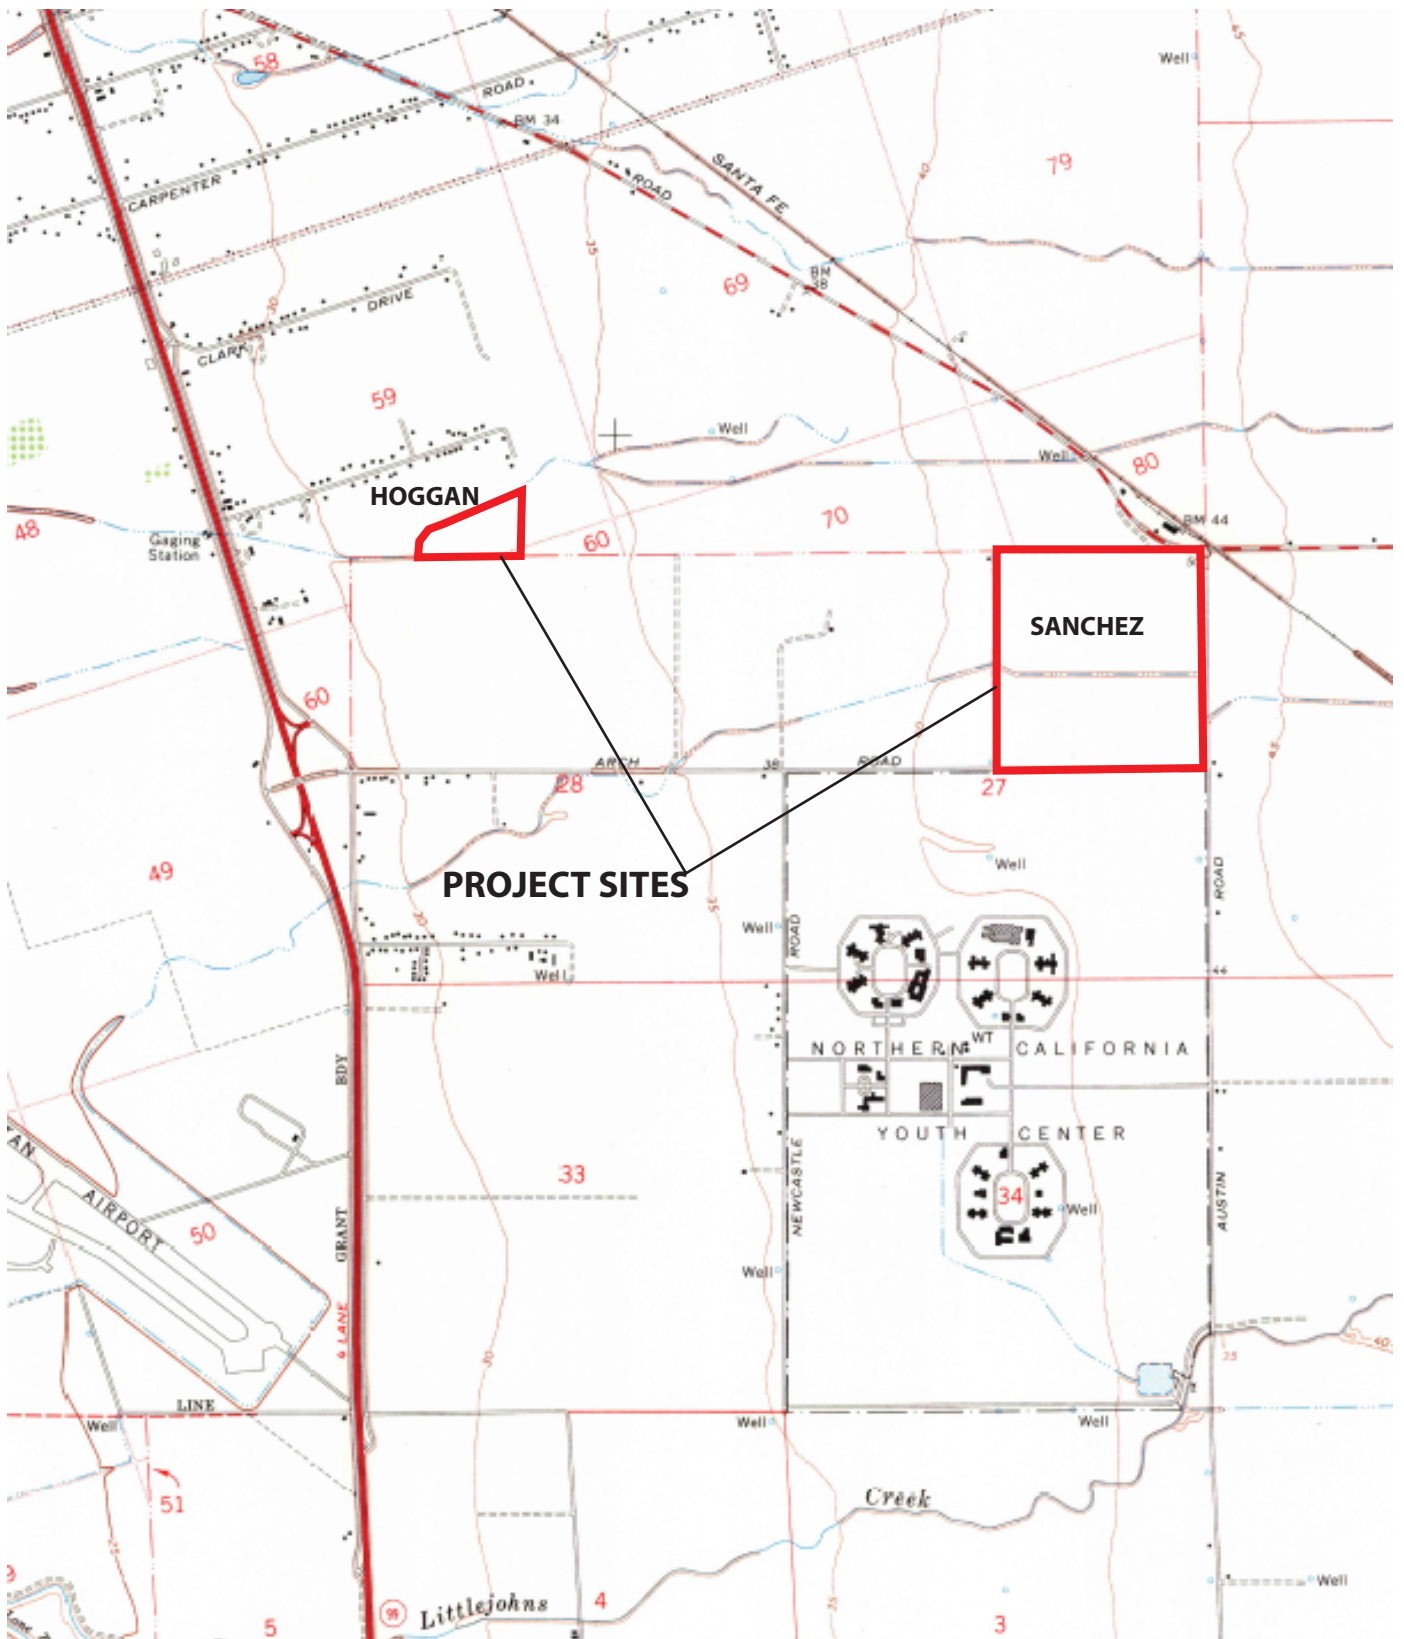

Growth-Inducing Impacts

The EIR will include consideration of the potential effects of the proposed industrial development on planned or potential urban development in the southeast Stockton area using the “general plan projections method,” relying on the City’s recently adopted Envision Stockton 2040 General Plan and EIR.

Re: Sanchez-Hoggan Annexation Project
SCH# 2020020006

Attached for your review and comment is the Notice of Preparation (NOP) for the Sanchez-Hoggan Annexation Project draft Environmental Impact Report (EIR).

Responsible agencies must transmit their comments on the scope and content of the NOP, focusing on specific information related to their own statutory responsibility, within 30 days of receipt of the NOP from the Lead Agency. This is a courtesy notice provided by the State Clearinghouse with a reminder for you to comment in a timely manner. We encourage other agencies to also respond to this notice and express their concerns early in the environmental review process.

Please direct your comments to:

Matt Diaz
Stockton, City of
345 N. El Dorado Street
Stockton, CA 95202

with a copy to the State Clearinghouse in the Office of Planning and Research at state.clearinghouse@opr.ca.gov. Please refer to the SCH number noted above in all correspondence concerning this project on our website: <https://ceqanet.opr.ca.gov/2020020006/2>.

If you have any questions about the environmental document review process, please call the State Clearinghouse at (916) 445-0613.

Sincerely,

Scott Morgan
Director, State Clearinghouse

Sanchez-Hoggan NOP
SCH 2020020006
10-SJ-99-PM14.231

Mr. Diaz
City of Stockton
345 N El Dorado Street
Stockton, CA 95202

Dear Mr. Diaz,

The California Department of Transportation (Department) appreciates the opportunity to review and comment on the Sanchez-Hoggan NOP. The Department has the following comment:

The Department has no objection to the annexation of property at this location. However, the Department would like to review any future entitlement applications and site plans describing additional on site activities. Comments may be provided by the Department regarding the impacts of those activities after the Department's review. Please forward the Lead Agency's California Environmental Quality Act (CEQA) determination and supporting documentation to the Department for mitigation monitoring.

If you have any questions, please contact Joshua Swearingen at (209) 948-7142 (email: Joshua.swearingen@dot.ca.gov) or me at (209) 941-1921. We look forward to continuing to work with you in a cooperative manner.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tom Dumas".

San Joaquin County Multi-Species Habitat Conservation & Open Space Plan (SJMSCP)

SJMSCP RESPONSE TO LOCAL JURISDICTION (RTLJ) ADVISORY AGENCY NOTICE TO SJCOG, Inc.

To: Matt Diaz, City of Stockton, Community Development Department

From: Laurel Boyd, SJCOG, Inc.

Date: February 6, 2020

-Local Jurisdiction Project Title: Notice of Preparation for an EIR for the Sanchez-Hoggan Annexation Project (P19-0691)

Assessor Parcel Number(s): 181-100-09, 179-200-27

Local Jurisdiction Project Number: P-19-0691

Total Acres to be converted from Open Space Use: Unknown

Habitat Types to be Disturbed: Agricultural Habitat Land

Species Impact Findings: Findings to be determined by SJMSCP biologist.

Dear Mr. Diaz:

SJCOG, Inc. has reviewed the Notice of Preparation of an EIR for the Sanchez-Hoggan Annexation Project. This project intends to enlarge the Stockton City Limit boundary to include the proposed project parcels.

The Sanchez Property (APN: 181-100-09) proposes to construct four industrial buildings totaling approximately 2,800,000 square feet. These industrial buildings would include warehouse, office and distribution uses consistent with the zoning code and surrounding existing uses. The project anticipates onsite improvements to include approximately 2,900 automobile and trailer parking stalls, pedestrian walkways, lighting, landscaping and a storm drainage detention basin. Another 7.32 acres is within a drainage corridor occupied by Weber Slough; no development would occur within this drainage corridor.

The Hoggan Property (APN: 179-200-27) anticipates approximately 300,000 square feet of future industrial space. Future construction could accommodate up to 270 automobile and trailer parking stalls, pedestrian walkways, landscaping, lighting, and storm water detention basins. The site includes a structural set-back along North Littlejohns Creek and would not permit development to preserve the creek. Primary access to the Hoggan property would be from an extension of the existing terminus of Frontier Way located immediately south of the site.

The project site, consisting of two properties: 1) Sanchez Property (APN: 181-100-09) is located at the northwest corner of the intersection of Arch Road and Austin Road, Stockton; and 2) Hoggan Property (APN: 179-200-27) is located between North Littlejohn's Creek and existing development along the north side of Gold River Lane, Stockton.

The City of Stockton is a signatory to San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Participation in the SJMSCP satisfies requirements of both the state and federal endangered species acts, and ensures that the impacts are mitigated below a level of significance in compliance with the California Environmental Quality Act (CEQA). [The LOCAL JURISDICTION retains responsibility for ensuring that the appropriate Incidental Take Minimization Measure are properly implemented and monitored and that appropriate fees are paid in compliance with the SJMSCP.](#) Although participation in the SJMSCP is voluntary, Local Jurisdiction/Lead Agencies should be aware that if project applicants choose against participating in the SJMSCP, they will be required to provide alternative mitigation in an amount and kind equal to that provided in the SJMSCP.

This Project is subject to the SJMSCP. This can be up to a 30 day process and it is recommended that the project applicant contact SJMSCP staff as early as possible. It is also recommended that the project applicant obtain an information package. <http://www.sjco.org>

Please contact SJMSCP staff regarding completing the following steps to satisfy SJMSCP requirements:

- Schedule a SJMSCP Biologist to perform a pre-construction survey ***prior to any ground disturbance***

- SJMSCP Incidental take Minimization Measures and mitigation requirement:
 1. Incidental Take Minimization Measures (ITMMs) will be issued to the project and must be signed by the project applicant prior to any ground disturbance but no later than six (6) months from receipt of the ITMMs. If ITMMs are not signed within six months, the applicant must reapply for SJMSCP Coverage. Upon receipt of signed ITMMs from project applicant, SJCOG, Inc. staff will sign the ITMMs. This is the effective date of the ITMMs.
 2. Under no circumstance shall ground disturbance occur without compliance and satisfaction of the ITMMs.
 3. Upon issuance of fully executed ITMMs and prior to any ground disturbance, the project applicant must:
 - a. Post a bond for payment of the applicable SJMSCP fee covering the entirety of the project acreage being covered (the bond should be valid for no longer than a 6 month period); or
 - b. Pay the appropriate SJMSCP fee for the entirety of the project acreage being covered; or
 - c. Dedicate land in-lieu of fees, either as conservation easements or fee title; or
 - d. Purchase approved mitigation bank credits.
 4. Within 6 months from the effective date of the ITMMs or issuance of a building permit, whichever occurs first, the project applicant must:
 - a. Pay the appropriate SJMSCP for the entirety of the project acreage being covered; or
 - b. Dedicate land in-lieu of fees, either as conservation easements or fee title; or
 - c. Purchase approved mitigation bank credits.

Failure to satisfy the obligations of the mitigation fee shall subject the bond to be called.
- Receive your Certificate of Payment and release the required permit

It should be noted that if this project has any potential impacts to waters of the United States [pursuant to Section 404 Clean Water Act], it would require the project to seek voluntary coverage through the unmapped process under the SJMSCP which could take up to 90 days. It may be prudent to obtain a preliminary wetlands map from a qualified consultant. If waters of the United States are confirmed on the project site, the Corps and the Regional Water Quality Control Board (RWQCB) would have regulatory authority over those mapped areas [pursuant to Section 404 and 401 of the Clean Water Act respectively] and permits would be required from each of these resource agencies prior to grading the project site.

If you have any questions, please call (209) 235-0600.

Hello,
Thank you for the informative public scoping meeting Wednesday.
I added in red below some clarifying statements.
Sincerely,

Mary Elizabeth M.S., R.E.H.S.

From: [Matt Diaz](#)

Cc: csimpson@basecampenv.com
Subject: Sanchez-Hoggan Scoping Meeting 2/19/20

Hello Mary,

It was a pleasure meeting you yesterday. Below is my summary of your concerns. If I have missed anything please feel free to add, but I will send a response to each item once the Draft EIR is ready for circulation. I have included Charlie on this email in case I have missed anything.

Comments

- Growth inducing impacts
- Cumulative vs Project specific impacts. **For transportation and air quality (includes inside and outside of our airshed)**
- Defined truck routes. Both in the traffic report and possible means to avoid other areas. **And travel on roads that are sufficiently designed to have a 50 year life**
- Stormwater Plan- on and off site.
- Signals. Timing and location
- Air Quality Impacts. GHG and possible use of fuel-efficient trucks **and compliance with the City's Climate Action Plan**
- Zone 9 flooding **and road improvement mitigations**
- Is the detention basin unlined? If so, any measures or conditions to ensure no impact. **To groundwater quality**
- Retention timing for basin. Means to avoid bugs from pooling. Check design.
- **Habitat mitigation and streamflow alternation**

Again, if I have missed anything let me know and thanks again for taking the time to talk with us. The project and environmental documents will be posted online at <http://www.stocktonca.gov/government/departments/communityDevelop/cdPlanEnv.html> but if there is anything else you need prior to circulation of the DEIR let us know.

Re: CEQA – Project Title: Sanchez-Hoggan Annexation Project
City Project File # P19-0691

Dear Mr. Diaz,

The California Valley Miwok Tribe is in receipt of your notice of preparation of a draft Environmental Impact Report dated (Jan 29, 2020). The Tribe is aware of a proposed project consisting of two properties in the unincorporated area of San Joaquin County, adjacent to the southeastern limits of the City of Stockton.

The Tribe further understands that the 149.01 acre Sanchez property consisting of Assessor's Parcel Number 181-100-09 is located at the northeast corner of the intersection of Arch Road and Austin Road. The 20.76 acre Hoggan property consisting of APN 179-200-27, is located between North Lifflejohns Creek and existing development along the north side of Gold River Lane. The project will require San Joaquin LAFCO approval of annexation to the city, and City of Stockton approvals of Prezoning and a Tentative Parcel Map.

The California Valley Miwok Tribe has no issues or concerns with the proposed Sanchez-Hoggan Annexation Project - City Project File # P19-0691

Respectfully Submitted,

Silvia Burley, Chairperson
California Valley Miwok Tribe

Re: 2020020006, Sanchez-Hoggan Annexation Project, San Joaquin County

Dear Mr. Diaz:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

- 1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project:** Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

 - a. A brief description of the project.
 - b. The lead agency contact information.
 - c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
 - d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).
- 2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report:** A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1 (b)).

 - a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).
- 3. Mandatory Topics of Consultation If Requested by a Tribe:** The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

 - a. Alternatives to the project.
 - b. Recommended mitigation measures.
 - c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).
- 4. Discretionary Topics of Consultation:** The following topics are discretionary topics of consultation:

 - a. Type of environmental review necessary.
 - b. Significance of the tribal cultural resources.
 - c. Significance of the project's impacts on tribal cultural resources.
 - d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).
- 5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process:** With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).
- 6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document:** If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

 - a. Whether the proposed project has a significant impact on an identified tribal cultural resource.
 - b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

- 7. Conclusion of Consultation:** Consultation with a tribe shall be considered concluded when either of the following occurs:
- a.** The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or
 - b.** A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).
- 8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document:** Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).
- 9. Required Consideration of Feasible Mitigation:** If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).
- 10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:**
- a.** Avoidance and preservation of the resources in place, including, but not limited to:
 - i.** Planning and construction to avoid the resources and protect the cultural and natural context.
 - ii.** Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.
 - b.** Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:
 - i.** Protecting the cultural character and integrity of the resource.
 - ii.** Protecting the traditional use of the resource.
 - iii.** Protecting the confidentiality of the resource.
 - c.** Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.
 - d.** Protecting the resource. (Pub. Resource Code §21084.3 (b)).
 - e.** Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).
 - f.** Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).
- 11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource:** An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:
- a.** The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.
 - b.** The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.
 - c.** The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. **Tribal Consultation:** If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. **No Statutory Time Limit on SB 18 Tribal Consultation.** There is no statutory time limit on SB 18 tribal consultation.
3. **Confidentiality:** Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. **Conclusion of SB 18 Tribal Consultation:** Consultation should be concluded at the point in which:
 - a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
 - b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: <http://nahc.ca.gov/resources/forms/>.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (http://ohp.parks.ca.gov/?page_id=1068) for an archaeological records search. The records search will determine:
 - a. If part or all of the APE has been previously surveyed for cultural resources.
 - b. If any known cultural resources have already been recorded on or adjacent to the APE.
 - c. If the probability is low, moderate, or high that cultural resources are located in the APE.
 - d. If a survey is required to determine whether previously unrecorded cultural resources are present.
2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
 - a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
 - b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
 - a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
 - b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
 - a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, § 15064.5(f) (CEQA Guidelines § 15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
 - b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
 - c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code § 7050.5, Public Resources Code § 5097.98, and Cal. Code Regs., tit. 14, § 15064.5, subdivisions (d) and (e) (CEQA Guidelines § 15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Nancy.Gonzalez-Lopez@nahc.ca.gov.

Community Development

February 18, 2020

Mr. Matt Diaz
City of Stockton
345 N. El Dorado Street
Stockton, California 95202

Subject: Sanchez-Hoggan Annexation Project, Notice of Preparation
SCH No. 2020020006

Location: San Joaquin County

Dear Mr. Diaz,

Central Valley Flood Protection Board (Board) staff has reviewed the subject document and provides the following comments:

The proposed project is within Littlejohn's Creek, a regulated stream under Board jurisdiction, and may require a Board permit prior to construction.

The Board's jurisdiction covers the entire Central Valley including all tributaries and distributaries of the Sacramento and San Joaquin Rivers, and the Tulare and Buena Vista basins south of the San Joaquin River.

Under authorities granted by California Water Code and Public Resources Code statutes, the Board enforces its Title 23, California Code of Regulations (Title 23) for the construction, maintenance, and protection of adopted plans of flood control, including the federal-State facilities of the State Plan of Flood Control, regulated streams, and designated floodways.

Pursuant to Title 23, Section 6 a Board permit is required prior to working within the Board's jurisdiction for the placement, construction, reconstruction, removal, or abandonment of any landscaping, culvert, bridge, conduit, fence, projection, fill, embankment, building, structure, obstruction, encroachment, excavation, the planting, or removal of vegetation, and any repair or maintenance that involves cutting into the levee.

Permits may also be required to bring existing works that predate permitting into compliance with Title 23, or where it is necessary to establish the conditions normally imposed by permitting. The circumstances include those where responsibility for the works has not been clearly established or ownership and use have been revised.

Mr. Matt Diaz
February 18, 2020
Page 2 of 2

Other federal (including U.S. Army Corps of Engineers Section 10 and 404 regulatory permits), State and local agency permits may be required and are the applicant's responsibility to obtain.

Board permit applications and Title 23 regulations are available on our website at <http://www.cvfpb.ca.gov/>. Maps of the Board's jurisdiction are also available from the California Department of Water Resources website at <http://gis.bam.water.ca.gov/bam/>.

Encroachment permit applications received on or after July 1, 2019 are subject to fees, additional information is available on the Board's website at <http://cvfpb.ca.gov/fees-2019/>.

Please contact James Herota at (916) 574-0651, or via email at James.Herota@CVFlood.ca.gov if you have any questions.

Sincerely,

Andrea Buckley
Environmental Services and Land Management Branch Chief

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-Rail	632.12	1000sqft	14.51	632,120.00	0
Unrefrigerated Warehouse-No Rail	291.47	1000sqft	6.69	291,468.00	0
Unrefrigerated Warehouse-Rail	1,181.04	1000sqft	27.11	1,181,040.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.7	Precipitation Freq (Days)	51
Climate Zone	2			Operational Year	2026
Utility Company	Pacific Gas & Electric Company				
CO2 Intensity (lb/MW hr)	641.35	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Construction Phase - No demolition.

Grading - Acres to be graded.

Architectural Coating - Per SJVAPCD Rule 4601.

Vehicle Trips - Trip generation figures from traffic study.

Area Coating - Per SJVAPCD Rule 4601.

Consumer Products - Based on latest information from ARB.

Lodi, CA 95240

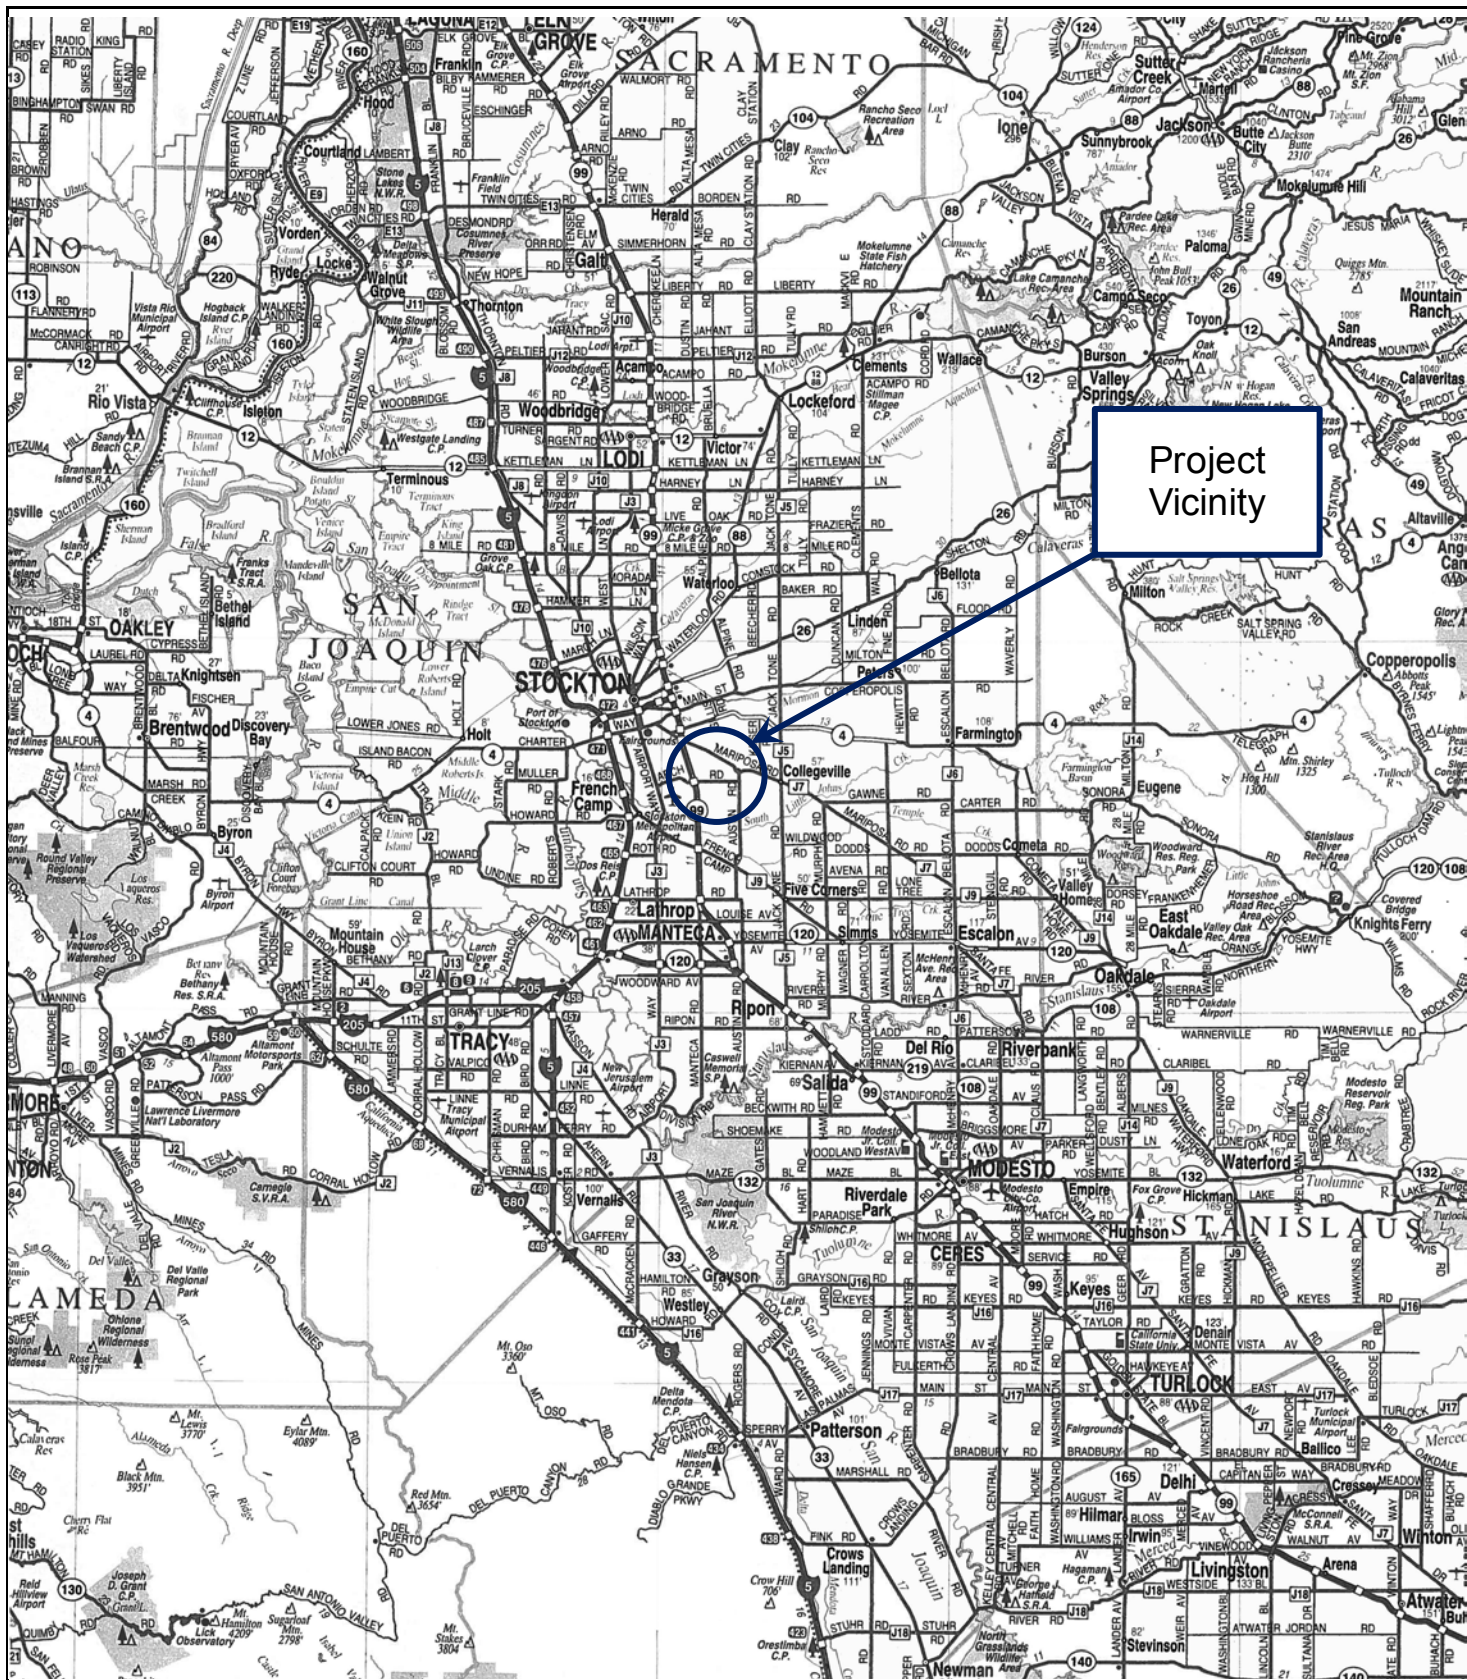

Subject: "SANCHEZ/HOGGAN PROJECT", STOCKTON, SAN JOAQUIN
COUNTY, CALIFORNIA: BIOLOGICAL ASSESSMENT

Dear Charlie:

Thank you for asking Moore Biological Consultants to prepare a biological assessment for this site in southeast Stockton, San Joaquin County, California (Figures 1 and 2). The purpose of this assessment is to describe existing biological resources in the site, identify potentially significant impacts to biological resources from industrial development, and provide recommendations for how to reduce those impacts to a less-than-significant level. The work involved reviewing databases, aerial photographs, and documents, and conducting field surveys to document vegetation communities, potentially jurisdictional Waters of the U.S. and/or wetlands, and potentially suitable habitat for or presence of special-status species. This report details the methodology and results of our investigation.

Project Overview

The project site includes two parcels adjacent to the NorCal Logistics Center, encompassing a total of 169+/- acres. The 20 +/- acre Hoggan Parcel and the 149+/- acre Sanchez Parcel are located on the west and east edges of the NorCal Logistics Center, respectively (Figure 2). These parcels are collectively

referred to as the “project site”. The Sanchez Parcel will be developed in three industrial buildings, while the Sanchez Parcel will provide be developed with additional industrial building (see Site Plans in Attachment A). Minor road widening and shoulder improvements to Austin Road are expected along the east edge of the Sanchez Parcel.

Storm water of the Sanchez Parcel will be treated on-site and then released in to Weber Slough via a new storm drain outfall. In contrast, storm water of the Hoggan Parcel will be treated on-site and then released in to the existing NorCal Logistics Center storm drain system. The City will provide sewer and water service to the project.

Methods

Prior to the field survey, we conducted a search of California Department of Fish and Wildlife's (CDFW) California Natural Diversity Database (CNDDDB, 2019). The CNDDDB search was conducted on the USGS 7.5-minute Stockton West, Stockton East, Lathrop, and Manteca topographic quadrangles, encompassing approximately 240+/- square miles surrounding the site (Attachment B). The United States Fish and Wildlife Service (USFWS) IPaC Trust Resource Report of Federally Threatened and Endangered species that may occur in or be affected by projects in the project vicinity was also reviewed (Attachment B). This information was used to identify special-status wildlife and plant species that have been previously documented in the vicinity or have the potential to occur based on suitable habitat and geographical distribution. Additionally, the CNDDDB depicts the locations of sensitive habitats. The USFWS on-line-maps of designated critical habitat in the area were also downloaded.

Field surveys were conducted on January 28, February 18, and July 5, 2019. The surveys consisted of walking throughout the site making observations of habitat conditions and noting surrounding land uses, habitat types, and plant and

wildlife species. The fieldwork included an assessment of potentially jurisdictional Waters of the U.S. and wetlands as defined by the U.S. Army Corps of Engineers (ACOE, 1987; 2008) and a search for special-status species and suitable habitat for special-status species (e.g., blue elderberry shrubs, vernal pools). Trees in and near the site were assessed for the potential use by nesting raptors, especially Swainson's hawk (*Buteo swainsoni*). The grassland areas in the site were searched for burrowing owls (*Athene cunicularia*) or ground squirrel burrows with evidence of past occupancy.

Results

GENERAL SETTING: The project site is in the unincorporated community of Stockton, in San Joaquin County, California (Figure 1). The Sanchez Parcel is located in Section 27 and the Hoggan Parcel is located in Sections 59 and 60; both parcels are within Township 1 North, Range 7 East of the USGS 7.5-minute Stockton East topographic quadrangle (Figure 2). The site is nearly level and ranges in elevation of approximately 30 to 45 feet above mean sea level.

The Sanchez Parcel consists of leveled fields, being used for farming of various annual crops (Figure 3 and photographs in Attachment C). A channelized section of Weber Slough flows through the Sanchez Parcel from east to west, with culvert crossings under Austin Road and Logistics Drive, respectively. The body of the Hoggan Parcel is annual grassland that appears to be periodically mowed and/or disked and not used recently for farming (Figure 4 and photographs in Attachment C). There is a small abandoned home site in the north tip of the Hoggan Parcel and North Littlejohns Creek runs along the entire north edge of the Hoggan Parcel.

Surrounding land uses in this portion of San Joaquin County are primarily industrial and agricultural. The Sanchez Parcel is bounded to the east by Austin Road, to the south by Arch Road and to the west by Logistics Drive. Mariposa Road bounds the northeast corner of the Sanchez Parcel and there is cropland to

AERIAL - HOGGAN

Sanchez/Hoggan

City of Stockton, San Joaquin County, CA

the north of the site (Figure 3). Extending out from the Sanchez Parcel, there are leveled fields, areas of cropland and industrial facilities. The fields across Arch Road to the south of the Sanchez Parcel are bare dirt and a prison.

The Hoggan Parcel is bounded to the north and west with ranchette-style homes on relatively large parcels and is bounded to the east by leveled cropland (Figure 4). The south edge of the Hoggan Parcel is bordered by existing industrial development within the Norcal project. Lands east of Hoggan Parcel are Norcal lands, which are in agricultural use, but entitled for industrial development. In general, areas surrounding the site and a bit further away are residential parcels, pockets of industrial areas, cropland, and open fallow fields.

VEGETATION: The body of the Sanchez Parcel is cropland that was farmed in hay crops in Spring 2019, while the Hoggan Parcel was fallow. Beyond the cropland, vegetation in the Sanchez parcel is constrained to the road shoulders surrounding the site and along the edges of Weber Slough. In contrast, vegetation throughout the Hoggan Parcel is homogenous grassland. Due to the amount of disturbance from agriculture, development, and periodic mowing, spraying and/or disking for weed abatement, vegetation in the project site is primarily annual grass and weed species. Similar annual grassland species were found in both parcels.

California annual grassland series (Sawyer and Keeler-Wolf, 1995) best describes the disturbed grassland vegetation in the project site. Grasses including oats (*Avena* sp.), ripgut brome (*Bromus diandrus*), and foxtail barley (*Hordeum murinum*), are dominant grass species. Other grassland species such as black mustard (*Brassica nigra*), tarweed (*Holocarpha virgata*), prickly lettuce (*Lactuca serriola*), miner's lettuce (*Claytonia perfoliata*), filaree (*Erodium botrys*), and common mallow (*Malva neglecta*) are intermixed with the grasses. Table 1 is a list of plant species observed in the site.

TABLE 1
PLANT SPECIES OBSERVED IN THE PROJECT SITE

<i>Amsinckia menziesii</i>	rancher's fireweed
<i>Avena sp.</i>	wild oat
<i>Brassica nigra</i>	black mustard
<i>Bromus diandrus</i>	ripgut brome
<i>Bromus hordeaceus</i>	soft brome
<i>Capsella bursa-pastoris</i>	shepherd's purse
<i>Centaurea solstitialis</i>	yellow star thistle
<i>Cirsium vulgare</i>	bull thistle
<i>Claytonia perfoliata</i>	miner's lettuce
<i>Cynara cardunculus</i>	artichoke thistle
<i>Epilobium brachycarpum</i>	fireweed
<i>Erigeron bonariensis</i>	asthmaweed
<i>Erodium botrys</i>	filaree
<i>Erodium cicutarium</i>	red-stem filaree
<i>Foeniculum vulgare</i>	fennel
<i>Galium aparine</i>	common bedstraw
<i>Geranium dissectum</i>	dissected geranium
<i>Geranium molle</i>	soft geranium
<i>Helianthus annuus</i>	common sunflower
<i>Holocarpha virgata</i>	tarweed
<i>Hordeum murinum</i>	foxtail barley
<i>Lactuca serriola</i>	prickly lettuce
<i>Leontodon saxatilis</i>	long-beaked hawkbit
<i>Malva neglecta</i>	common mallow
<i>Populus fremontii</i>	Fremont cottonwood
<i>Prunus dulcis</i>	almond
<i>Quercus lobata</i>	valley oak
<i>Raphanus sativa</i>	radish
<i>Rosa californica</i>	California wild rose
<i>Rumex crispus</i>	curly dock
<i>Salix gooddingii</i>	Gooding's black willow
<i>Salsola iberica</i>	Russian thistle
<i>Sonchus asper</i>	sow thistle
<i>Trifolium hirtum</i>	rose clover
<i>Vicia americana</i>	American purple vetch

The only trees in the Sanchez Parcel are six (6) ornamental trees along Austin Road, adjacent to the section of Weber Slough that is channelized along the east side of the road (Figure 3 and photographs in Attachment C). Although not within the project site, there are a few large trees just south of the site, south of and across Arch Road. There are several trees in the Hoggan Parcel, primarily in the North Littlejohns Creek riparian corridor along the north edge of the parcel. Dominant trees along the creek include valley oak (*Quercus lobata*), Fremont cottonwood (*Populus fremontii*), and Goodding's black willow (*Salix gooddingii*); there are patches of wild rose (*Rosa californica*) in the understory of the riparian corridor. There are also several valley oak trees surrounding the abandoned building in the northeast part of the parcel and there is a lone valley oak along the south edge of the Hoggan parcel (see photographs in Attachment C).

No blue elderberry (*Sambucus mexicana*) shrubs were observed in or adjacent to the project site.

WILDLIFE: A limited variety of bird species were observed during the field surveys, all of which are common species found in agricultural and riparian areas of San Joaquin County (Table 2). Turkey vulture (*Cathartes aura*), American kestrel (*Falco sparverius*), northern mockingbird (*Mimus polyglottos*), and white-crowned sparrow (*Zonotrichia leucophrys*) are representative of the avian species observed in the site.

There are several potential nest trees in the Hoggan Parcel that are suitable for nesting raptors and other protected migratory birds, including Swainson's hawk. There are some large trees in close proximity to the Sanchez Parcel that may also be used for nesting by migratory birds. Due to the presence of large trees and suitable raptor foraging habitat (i.e., open fields) in and near the site, it is possible one or more pairs of raptors nest in trees in or near the site during some years. Smaller birds, such as songbirds, could potentially nest within the small trees and grasslands in the site, particularly within the North Littlejohns Creek riparian corridor.

TABLE 2
WILDLIFE SPECIES DOCUMENTED IN THE PROJECT SITE

BIRDS

Turkey vulture	<i>Cathartes aura</i>
Red-tailed hawk	<i>Buteo jamaicensis</i>
American kestrel	<i>Falco sparverius</i>
Rock dove	<i>Columba livia</i>
Mourning dove	<i>Zenaida macroura</i>
Anna's hummingbird	<i>Calypte anna</i>
Northern flicker	<i>Colaptes auratus</i>
Black phoebe	<i>Sayornis nigricans</i>
California scrub jay	<i>Aphelocoma californica</i>
Northern mockingbird	<i>Mimus polyglottos</i>
Loggerhead shrike	<i>Lanius ludovicianus</i>
Yellow-rumped warbler	<i>Setophaga coronata</i>
White-crowned sparrow	<i>Zonotrichia leucophrys</i>
Red-winged blackbird	<i>Agelaius phoeniceus</i>

Mammals

Botta's pocket gopher	<i>Thomomys bottae</i>
Coyote	<i>Canis latrans</i>
Raccoon	<i>Procyon lotor</i>

A limited variety of mammals common to agricultural areas are likely occur in the project site. Tracks from coyote (*Canis latrans*) and raccoon (*Procyon lotor*) and sign of Botta's pocket gopher (*Thomomys bottae*) were observed in the Sanchez Parcel during the survey; no mammals or sign of mammals were observed in the Hoggan Parcel. Other common species such as black-tailed hare (*Lepus californicus*), striped skunk (*Mephitis mephitis*), desert cottontail (*Sylvilagus*

audubonii), and Virginia opossum (*Didelphis virginiana*) are expected to occur in the project site on occasion. California ground squirrels (*Spermophilus beecheyi*) are widespread in agricultural areas and may occur on-site. However, no California ground squirrels or their burrows were observed in the site.

Due to lack of suitable habitat, few amphibians and reptiles are expected to use habitats in the site and none were observed. Common species such as western fence lizard (*Sceloporus occidentalis*), Pacific chorus frog (*Pseudacris regilla*) and western terrestrial garter snake (*Thamnophis elegans*) may occur in the site.

As Weber Slough is ephemeral and North Littlejohns Creek is intermittent and is dry much of the year, neither creek provides suitable aquatic habitat for fish.

WATERS OF THE U.S. AND WETLANDS: Waters of the U.S., including wetlands, are broadly defined under 33 Code of Federal Regulations (CFR) 328 to include navigable waterways, their tributaries, and adjacent wetlands. State and federal agencies regulate these habitats and Section 404 of the Clean Water Act requires that a permit be secured prior to the discharge of dredged or fill materials into any waters of the U.S., including wetlands. ACOE, CDFW, and the California Regional Water Quality Control Board (RWQCB) have jurisdiction over modifications to riverbanks, lakes, stream channels and other wetland features.

“Waters of the U.S.”, as defined in 33 CFR 328.4, encompasses Territorial Seas, Tidal Waters, and Non-Tidal Waters. Non-Tidal Waters include interstate and intrastate rivers and streams, as well as their tributaries. The limit of federal jurisdiction of Non-Tidal Waters of the U.S. extends to the “ordinary high water mark”. The ordinary high water mark is established by physical characteristics such as a natural water line impressed on the bank, presence of shelves, destruction of terrestrial vegetation, or the presence of litter and debris.

Jurisdictional wetlands are vegetated areas that meet specific vegetation, soil, and hydrologic criteria defined by the ACOE *Wetlands Delineation Manual* and

Regional Supplement (ACOE, 1987; 2008). Jurisdictional wetlands are usually adjacent to or hydrologically associated with Waters of the U.S; isolated wetlands are outside federal jurisdiction.

Jurisdictional wetlands and Waters of the U.S. include, but are not limited to, perennial and intermittent creeks and drainages, lakes, seeps, and springs; emergent marshes; riparian wetlands; and seasonal wetlands. Wetlands and Waters of the U.S. provide critical habitat components, such as nest sites and a reliable source of water, for a wide variety of wildlife species.

On February 14, 2019, the Environmental Protection Agency (EPA) and ACOE proposed a new definition of "Waters of the United States" that is intended to clarify the limits of jurisdiction under the Clean Water Act; the Proposed Rule is currently out for public comment. The Proposed Rule proposes as a baseline concept that "Waters of the U.S." are waters within the ordinary meaning of the term, such as oceans, rivers, streams, lakes, ponds, and wetlands. The Proposed Rule clarifies that "Waters of the U.S." encompass traditional navigable waters, including the territorial seas; tributaries that contribute perennial or intermittent flow to such waters; certain ditches; certain lakes and ponds; impoundments of otherwise jurisdictional waters; and wetlands adjacent to other jurisdictional waters. Under the Proposed Rule, not all waters are "Waters of the U.S.". For example, many ditches, constructed features (excavated basins), isolated waters and wetlands, and ephemeral tributaries would no longer meet the definition of "Waters of the U.S.".

WATERS OF THE STATE: Under the Porter-Cologne Water Quality Control Act, "Waters of the State" fall under the jurisdiction of the State Water Resource Control Board (SWRCB) and California Regional Water Quality Control Boards (RWQCBs). The RWQCBs are required to prepare and periodically update water quality control basin plans, which set forth water quality standards for surface water and groundwater, as well as actions to control non-point and point sources of pollution to achieve and maintain these standards.

Projects that affect Waters of the State may also be required to meet waste discharge requirements (WDRs) of the RWQCBs. SWRCB's Resolution 2008-0026 identified a need to protect Waters of the State that are not subject to CWA Section 404 permitting and associated CWA Section 401 Water Quality Certification. In April 2019, the SWRCB adopted the State Wetland Definition and Procedures for Discharges of Dredged or Fill Materials to Waters of the State. When the program is implemented, the Central Valley Regional Water Quality Board is expected to require WDRs for the fill of isolated wetlands that not subject to CWA Section 404 that authorize the impacts by issuing WDRs or in some cases, a WDR waiver.

Weber Slough is the only potentially jurisdictional Water of the U.S. in the Sanchez Parcel. Review of the USGS topographic map (Figure 2) reveals that Weber Slough is mapped as an intermittent "blue-line" drainage. After entering the east side of the site through a culvert under Austin Road, Weber Slough runs north along the west edge of Austin Road for about 600 feet and then turns to the west through the central part of the site, flowing from east to west. The potential jurisdictional limit of this section of Weber Slough is defined by an ordinary high water mark. The channel is trapezoidal and the mean width of the jurisdictional limits is approximately 6 feet.

Weber Slough depends on winter storms for seasonal flows and may convey excess irrigation water on occasion. Weber Slough is channelized, incised 3 to feet below the adjacent fields, and contained no water during the 2019 surveys (see photographs in Attachment C). Substrates in the active channel are dirt and a little bit of gravel. There is very little wetland vegetation in or along the on-site section of Weber Slough; vegetation in the channel primarily consists of upland grasses and weeds.

North Littlejohns Creek is the only potentially jurisdictional Water of the U.S. in the Hoggan Parcel. Review of the USGS topographic map (Figure 2) reveals

that North Littlejohns Creek is also mapped as an intermittent "blue-line" drainage. After entering the northeast corner of the site, North Littlejohns Creek runs along the north edge of the parcel, flowing from northeast to southwest. There is a low-flow farm road crossing where the creek enters the east edge of the site (see photographs in Attachment C). This road appears to have been used for access to the residence in the northeast part of the site. Similar to Weber Slough, the potential jurisdictional limit of North Littlejohns Creek is defined by an ordinary high water mark.

North Littlejohns Creek is intermittent, primarily conveying runoff water during the winter and agricultural tail water from fields just east of the site. North Littlejohns Creek is incised approximately 6 to 8 feet below the adjacent fields. The west end of the creek (downstream) contained a few inches of water during some of the surveys, while the east end (upstream) contained no standing water during any survey. Substrates in the active channel are primarily dirt and there is essentially no vegetation in the creekbed. Valley oak, Goodding's black willow, and Fremont cottonwood are the dominant trees in the riparian corridor.

Both Weber Slough and North Littlejohns Creek are tributaries to French Camp Slough, which is in turn tributary to the San Joaquin River. The San Joaquin is a navigable jurisdictional water of the U. S. and the tributary relationship of Weber Slough to the San Joaquin River forms the basis for Weber Slough and North Littlejohns Creek being potentially jurisdictional Waters of the U.S. and under the jurisdiction of agencies including ACOE, CDFW, and the RWQCB.

SPECIAL-STATUS SPECIES: Special-status species are plants and animals that are legally protected under the state and/or federal Endangered Species Act or other regulations. The Federal Endangered Species Act (FESA) of 1973 declares that all federal departments and agencies shall utilize their authority to conserve endangered and threatened plant and animal species. The California Endangered Species Act (CESA) of 1984 parallels the policies of FESA and pertains to native California species.

Special-status species also include other species that are considered rare enough by the scientific community and trustee agencies to warrant special consideration, particularly with regard to protection of isolated populations, nesting or denning locations, communal roosts, and other essential habitat. The presence of species with legal protection under the Endangered Species Act often represents a major constraint to development, particularly when the species are wide-ranging or highly sensitive to habitat disturbance and where proposed development would result in a take of these species.

Special-status plants are those which are designated rare, threatened, or endangered and candidate species for listing by the USFWS. Special-status plants also include species considered rare or endangered under the conditions of Section 15380 of the California Environmental Quality Act Guidelines, such as those plant species identified on Lists 1A, 1B and 2 in the Inventory of Rare and Endangered Vascular Plants of California (CNPS, 2019). Finally, special-status plants may include other species that are considered sensitive or of special concern due to limited distribution or lack of adequate information to permit listing or rejection for state or federal status, such as those included on CNPS List 3.

The likelihood of occurrence of listed, candidate, and other special-status species in the site is generally low. Table 3 provides a summary of the listing status and habitat requirements of special-status species that have been documented in the greater project vicinity or for which there is potentially suitable habitat in the greater project vicinity. This table also includes an assessment of the likelihood of occurrence of each of these species in the site. The evaluation of the potential for occurrence of each species is based on the distribution of regional occurrences (if any), habitat suitability, and field observations.

SPECIAL-STATUS PLANTS: Special-status plants identified in the CNDDDB (2019) search include alkali milk-vetch (*Astragalus tener* var. *tener*), heartscale (*Atriplex cordulata* var. *cordulata*), big tarplant (*Blepharizonia plumosa*), watershield

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
PLANTS						
Alkali milk-vetch	<i>Astragalus tener</i> <i>var. tener</i>	None	None	1B	Alkali vernal pools.	None: the project site does not provide suitable habitat for this species; there are no vernal pools in the project site. The nearest occurrence of alkali milk-vetch in the CNDDDB (2019) search area is approximately 8 miles northwest of the site.
Heartscale	<i>Atriplex</i> <i>cordulata</i> var <i>cordulata</i>	None	None	1B	Valley and foothill grassland, chenopod scrub.	Unlikely: the grassland in the project site is highly disturbed and does not provide suitable habitat for heartscale. The nearest occurrence of this species in the CNDDDB (2019) search area is a historical record (1896) mapped nonspecifically in downtown Stockton, approximately 6 miles northwest of the site.
Big tarplant	<i>Blepharizonia</i> <i>plumosa</i>	None	None	1B	Valley and foothill grassland.	Unlikely: the grassland in the project site is highly disturbed and does not provide suitable habitat for big tarplant. The nearest occurrence of this species in the CNDDDB (2019) search area is a historical record (1874) mapped non-specifically in downtown Stockton, approximately 6 miles northwest of the site.
Watershield	<i>Brasenia</i> <i>schreberi</i>	None	None	2	Marshes and swamps.	Unlikely: there are no marshes or swamps in the project site to support this species. The only occurrence of water shield in the CNDDDB (2019) search area is an historical population mapped non-specifically in downtown Stockton, approximately 6 miles northwest of the site.
Palmate-bracted salty bird's-beak	<i>Chloropyron</i> <i>palmatum</i>	E	E	1B	Chenopod scrub, valley and foothill grassland.	Unlikely: the project site does not provide suitable habitat for this species. The nearest occurrence of palmate-bracted salty bird's-beak in the CNDDDB (2019) search area is a historical record mapped non-specifically around the vicinity of Stockton, approximately 8 miles northwest of the site.

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
Slough thistle	<i>Cirsium crassicaule</i>	None	None	1B	Chenopod scrub, marshes and swamps, and riparian scrub.	Unlikely: there is no suitable habitat for slough thistle in the site. The nearest occurrence of slough thistle in the CNDDDB (2019) search area is approximately 10 miles southwest of the site.
Recurved larkspur	<i>Delphinium recurvatum</i>	None	None	1B	Chenopod scrub in alkaline soils.	Unlikely: the site does not contain suitable habitat for this species. The CNDDDB (2019) search area contains only one historical (1937) sighting of recurved larkspur, mapped nonspecifically including a portion of the project site.
Delta button celery	<i>Eryngium racemosum</i>	None	E	1B	Riparian scrub in seasonally inundated floodplain with clay substrates.	Unlikely: there is no suitable habitat in the site for this species. The nearest occurrence of Delta button celery in the CNDDDB (2019) search area is approximately 11 miles southwest of the site.
San Joaquin spearscale	<i>Extriplex joaquinana</i>	None	None	1B	Chenopod scrub, alkali meadow, valley and foothill grassland.	None: the project site does not provide suitable habitat for this species. The nearest occurrence of San Joaquin spearscale in the CNDDDB (2019) search area is an historical population mapped non-specifically in downtown Stockton, approximately 5 miles northwest of the site.
Woolly rose mallow	<i>Hibiscus lasiocarpus var. occidentalis</i>	None	None	2	Freshwater marshes and swamps.	Unlikely: the site does not provide suitable habitat for woolly rose mallow. The nearest occurrence of this species in the CNDDDB (2019) search area is in the Calaveras River, approximately 10 miles northwest of the site.
Delta tule pea	<i>Lathyrus jepsonii var. jepsonii</i>	None	None	1B	Marshes and swamps.	Unlikely: the project site does not provide suitable habitat for this species. The nearest occurrence of delta tule pea in the CNDDDB (2019) search area is an historical population on Rough and Ready Island, approximately 9.5 miles northwest of the project site.

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
Sanford's arrowhead	<i>Sagittaria sanfordii</i>	None	None	1B	Standing or slow moving freshwater ponds, marshes, and ditches.	Unlikely: the project site does not provide suitable habitat for this species. The nearest occurrence of Sanford's arrowhead in the CNDDDB (2019) search area is an historical population mapped non-specifically in downtown Stockton, approximately 6 miles northwest of the project site.
Suisun marsh aster	<i>Symphotrichum lentum</i>	None	None	1B	Marshes and swamps.	Unlikely: the project site does not provide suitable habitat for this species. The nearest occurrence of Suisun marsh aster in the CNDDDB (2019) search area is in the Calaveras River, approximately 9 miles northwest of the project site.
Wright's trichocoronis	<i>Trichocoronis wrightii</i> var. <i>wrightii</i>	None	None	2	Marshes and swamps, riparian forest, meadows and seeps and vernal pools.	Unlikely: there is no suitable habitat for Wright's trichocoronis in the site. The nearest occurrence of this species in the CNDDDB (2019) search area is approximately 11 miles southwest of the site.
Saline clover	<i>Trifolium hydrophilum</i>	None	None	1B	Marshes and swamps, mesic (wet) areas in valley and foothill grassland, vernal pools.	Unlikely: the project site does not provide suitable habitat for this species. The nearest occurrence of saline clover in the CNDDDB (2019) search area is an historical population mapped non-specifically in downtown Stockton, approximately 6 miles northwest of the site.
WILDLIFE						
Birds						
Burrowing owl	<i>Athene cunicularia</i>	None	SC	N/A	Open, dry annual or perennial grasslands, deserts and scrublands characterized by low-growing vegetation.	Unlikely: portions of the project site provides marginally suitable habitat for burrowing owl. However, the grassland in the site is highly disturbed and maintained and other fields within the site are heavily cultivated. No burrowing owls or ground squirrel burrows were observed during the surveys. The nearest occurrence of nesting burrowing owls in the CNDDDB (2019) search area is approximately 1 mile south of the site.

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
Swainson's hawk	<i>Buteo swainsoni</i>	None	T	N/A	Breeds in stands of tall trees in open areas. Requires adjacent suitable foraging habitats such as grasslands or alfalfa fields supporting rodents.	Moderate: the site provides suitable foraging and nesting habitat for Swainson's hawks. The annual cropland in and surrounding the project site provides foraging habitat and large trees along North Littlejohns Creek are suitable for nesting Swainson's hawks. There are numerous records of Swainson's hawks in the CNDDDB (2019) search area; this species is recorded in several locations within a mile of the site.
Tricolored blackbird	<i>Agelaius tricolor</i>	None	CE	N/A	Requires open water and protected nesting substrate, usually cattails and riparian scrub with surrounding foraging habitat.	Low: the site provides marginally suitable habitat for tricolored blackbird. However, there is little to no emergent wetland vegetation in North Littlejohns Creek in or near the site that could be used by nesting tricolored blackbirds. The nearest occurrence of this species in the CNDDDB (2019) search area is approximately 7 miles northwest of the site.
White-tailed kite	<i>Elanus leucurus</i>	None	FP	N/A	Herbaceous lowlands with variable tree growth and dense population of voles.	Moderate: the site provides marginally suitable habitat for white-tailed kite. The annual cropland in surrounding the project vicinity provides foraging habitat for white-tailed kite and trees along North Littlejohns Creek are suitable for nesting. The nearest occurrence of white-tailed kite in the CNDDDB (2019) search area is approximately 3.5 miles northwest of the site.
Loggerhead shrike	<i>Lanius ludovicianus</i>	None	SC	N/A	Annual grasslands and agricultural areas; nests in trees and shrubs.	Low: the grasslands in the site provides marginally suitable foraging habitat for loggerhead shrike and trees and shrubs in the site are suitable for nesting. However, this species is not common in the project vicinity; the nearest occurrence of loggerhead shrike in the CNDDDB (2019) search area is approximately 10 miles southwest of the site.
Song sparrow ("Modesto" population)	<i>Melospiza melodia</i>	None	SC	N/A	Resident of brackish water marshes surrounding Suisun Bay. Inhabits cattails, tules, and tangles bordering sloughs.	Unlikely: the site does not provide suitable aquatic habitat for this species. North Littlejohns Creek and Weber Slough do not provide emergent wetland vegetation for nesting by Modesto song sparrow. The nearest occurrence of this species in the CNDDDB (2019) search area is approximately 8.5 miles southwest of the site.

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
Least Bell's vireo	<i>Vireo bellii pusillus</i>	E	E	N/A	Nests in willow thickets and other shrubs, primarily in southern California riparian forests.	Unlikely: there is no suitable habitat for least Bell's vireo in or near the site and this species is not known from the area. The nearest occurrence of least Bell's vireo in the CNDDDB (2019) search area is a historical population from 1878 mapped non-specifically in downtown Stockton, approximately 6 miles northwest of the site.
Yellow-headed blackbird	<i>Xanthocephalus xanthocephalus</i>	None	SC	N/A	Brackish and fresh water marshes; usually nests in expansive patches of cattails or tules, often along borders of lakes and ponds.	Unlikely: the site does not provide suitable habitat for this species. The nearest occurrence of yellow-headed blackbird in the CNDDDB (2019) search area is a historical record (1894) mapped non-specifically approximately 8.5 miles southwest of the site.
Mammals						
Riparian brush rabbit	<i>Sylvilagus bachmani riparius</i>	E	E	N/A	Riparian thickets in Stanislaus and southern San Joaquin Counties.	None: the project site and adjacent areas do not provide suitable habitat for riparian brush rabbit. The riparian corridor along North Littlejohns Creek does not contain well-developed riparian forest vegetation; there is no expansive scrub-shrub vegetation to support this species. The nearest occurrence of riparian brush rabbit in the CNDDDB (2019) search area is approximately 8 miles southwest of the project site.
Reptiles & Amphibians						
California red-legged frog	<i>Rana aurora draytonii</i>	T	SC	N/A	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation.	Unlikely: there is no suitable aquatic habitat for California red-legged frog in or near the project site. California red-legged frog is also presumed extinct on the floor of the Central Valley of California. There are no recorded occurrences of this species in the CNDDDB (2019) search area. The site is not within designated critical habitat for California red-legged frog (USFWS, 2006).

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
California tiger salamander	<i>Ambystoma californiense</i>	T	T	N/A	Seasonal water bodies without fish (i.e., vernal pools and stock ponds) and grassland/ woodland habitats with summer refugia (i.e., burrows).	Unlikely: there is no suitable habitat within or near the site for California tiger salamander. This species occurs in the transitional bands between the valley floor and foothills. The nearest occurrence of California tiger salamander in the CNDDDB (2019) search area is a historical record (1923) in downtown Stockton, approximately 8 miles northwest of the site. The site is not within designated critical habitat for California tiger salamander (USFWS, 2005a).
Giant garter snake	<i>Thamnophis gigas</i>	T	T	N/A	Freshwater marsh and low gradient streams; also adapted to drainage canals and irrigation ditches, primarily for dispersal or migration.	Unlikely: Weber Slough is ephemeral and does not provide suitable aquatic habitat for giant garter snake. North Littlejohns Creek is intermittent and does not contain suitable habitat for giant garter snake. The nearest occurrence of this species in the CNDDDB (2019) search area is approximately 5.5 miles northwest of the site.
Western pond turtle	<i>Emys marmorata</i>	None	SC	N/A	Permanent or semi-permanent water bodies; require basking sites such as logs	Unlikely: Weber Slough is ephemeral and does not provide suitable aquatic habitat for western pond turtle. North Littlejohns Creek is intermittent and also does not contain suitable habitat for western pond turtle. There are no occurrences of this species in the CNDDDB (2019) search area.
Fish						
Delta smelt	<i>Hypomesus transpacificus</i>	T	E	N/A	Shallow lower delta waterways with submersed aquatic plants and other suitable refugia.	None: there is no suitable aquatic habitat in the site to support this species; delta smelt occurs in delta waterways. The nearest occurrence of delta smelt in the CNDDDB (2019) approximately 10 miles northwest of the site. The project site is within designated critical habitat for delta smelt (USFWS, 1994).
Longfin smelt	<i>Spirinchus thaleichthys</i>	C	T	N/A	Brackish estuarine habitats.	None: there is no suitable aquatic habitat in the site to support this species. The nearest occurrence of longfin smelt in the CNDDDB (2019) approximately 10 miles northwest of the site in the San Joaquin River.

TABLE 3

SPECIAL-STATUS PLANT AND WILDLIFE SPECIES DOCUMENTED OR POTENTIALLY-OCCURRING IN THE PROJECT VICINITY

Common Name	Scientific Name	Federal Status ¹	State Status ²	CNPS List ³	Habitat	Potential for Occurrence in the Project Site
Steelhead – Central Valley DPS	<i>Oncorhynchus mykiss irideus pop. 11</i>	T	None	N/A	Riffle and pool complexes with adequate spawning substrates within Central Valley drainages.	None: there is no suitable aquatic habitat in the site to support this species. The nearest occurrence of Central Valley steelhead in the CNDDDB (2019) search area is approximately 3.5 miles north of the site in the San Joaquin River. The site is not in designated critical habitat for Central Valley steelhead (NOAA, 2005).
Invertebrates						
Valley elderberry longhorn beetle	<i>Desmocerus californicus dimorphus</i>	T	None	N/A	Elderberry shrubs, usually in Central Valley riparian habitats.	Unlikely: there are no blue elderberry shrubs in or near the site. The nearest occurrence of valley elderberry longhorn beetle in the CNDDDB (2019) search area is approximately 11 miles southwest of the site.
Vernal pool fairy shrimp	<i>Branchinecta lynchi</i>	T	None	N/A	Vernal pools	Unlikely: there are no vernal pools in the site. There are no occurrences of vernal pool fairy shrimp recorded in the CNDDDB (2019) in the search area. The site is not within designated critical habitat for vernal pool fairy shrimp (USFWS, 2005b).
Vernal pool tadpole shrimp	<i>Lepidurus packardii</i>	E	None	N/A	Vernal pools	Unlikely: there are no vernal pools in the site. There are no occurrences of vernal pool tadpole shrimp recorded in the CNDDDB (2019) in the search area. The site is not within designated critical habitat for vernal pool tadpole shrimp (USFWS, 2005b).

¹ T= Threatened; E = Endangered; C = Candidate.

² T = Threatened; E = Endangered; R = Rare; CE = Candidate for Endangered Status; SC=State of California Species of Special Concern; FP = Fully Protected Species.

³ CNPS List 1B includes species that are rare, threatened, or endangered in California and elsewhere; List 2 includes plants that are rare, threatened or endangered in California but are more common elsewhere.

(*Brasenia schreberi*), palmate-bracted salty bird's-beak (*Chloropyron plamatum*), slough thistle (*Cirsium crassicaule*), recurved larkspur (*Delphinium recurvatum*), Delta button celery (*Eryngium racemosum*), San Joaquin spearscale (*Extriplex joaquinana*), Woolly rose mallow (*Hibiscus lasiocarpus* var. *occidentalis*), Delta tule pea (*Lathyrus jepsonii* var. *jepsonii*), Sanford's arrowhead (*Sagittaria sanfordii*), Suisun marsh aster (*Symphotrichum lentum*), Wright's trichocornis (*Trichocoronis wrightii* var. *wrightii*) and saline clover (*Trifolium hydrophilum*) (Table 3 and Attachment B).

Special-status plants generally occur in relatively undisturbed areas in vegetation communities such as vernal pools, marshes and swamps, seasonal wetlands, riparian scrub, and areas with unusual soils. The cultivated fields and periodically disked grasslands in the site are highly disturbed and do not provide suitable habitat for any of the plants in Table 3 or other special-status plants. Due to their ephemeral and/or intermittent flow regimes, the creeks do not contain marsh or swamp habitat required by several of the special-status plant species in Table 3. Due to lack of suitable habitat, no special-status plants are expected to occur in the site.

SPECIAL-STATUS WILDLIFE: The potential for intensive use of habitats within the project site by special-status wildlife species is also very low. Special-status wildlife species that have been recorded in greater project vicinity in the CNDDDB (2019) include burrowing owl, Swainson's hawk, tricolored blackbird (*Agelaius tricolor*), white-tailed kite (*Elanus leucurus*), loggerhead shrike (*Lanius ludovicianus*), song sparrow ("Modesto population")(*Melospiza melodia*), least Bell's vireo (*Vireo bellii pusillus*), yellow-headed blackbird (*Xanthocephalus xanthocephalus*), riparian brush rabbit (*Sylvilagus bachmani riparius*), California tiger salamander (*Ambystoma californiense*), giant garter snake (*Thamnophis gigas*), delta smelt (*Hypomesus transpacificus*), longfin smelt (*Spirinchus thaleichthys*), Central Valley steelhead (*Oncorhynchus mykiss*) and valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*). Although not included in the CNDDDB within the search area, California red-legged frog (*Rana*

aurora draytonii), vernal pool fairy shrimp (*Branchinecta lynchi*), and vernal pool tadpole shrimp (*Lepidurus packardii*) are listed in the USFWS IPaC Trust Resource Report (Attachment B). Western pond turtle (*Actinemys marmorata*) was added to Table 3 because it is known to occur in creeks and rivers in the greater project vicinity.

While the project site may have provided habitat for special-status wildlife species at some time in the past, farming and development have substantially modified natural habitats in the greater project vicinity. Of the wildlife species identified in the CNDDDB, Swainson's hawk and burrowing owl are the only species with potential to occur in the site on more than a transitory or very occasional basis. Swainson's hawk, burrowing owl and white-tailed kite are discussed further below because they could be adversely affected by conversion of habitat to development and/or disturbed by construction if construction occurs in close proximity to active nests. Although not expected to occur in the site, giant garter snake and western pond turtle are also addressed below for completeness.

SWAINSON'S HAWK: The Swainson's hawk is a migratory hawk listed by the State of California as a Threatened species. The Migratory Bird Treaty Act and Fish and Game Code of California protect Swainson's hawks year-round, as well as their nests during the nesting season (March 1 through September 15). Swainson's hawk are found in the Central Valley primarily during their breeding season, a population is known to winter in the San Joaquin Valley.

Swainson's hawks prefer nesting sites that provide sweeping views of nearby foraging grounds consisting of grasslands, irrigated pasture, hay, and wheat crops. Most Swainson's hawks are migratory, wintering in Mexico and breeding in California and elsewhere in the western United States. This raptor generally arrives in the Central Valley in mid-March, and begins courtship and nest construction immediately upon arrival at the breeding sites. The young fledge in

early July, and most Swainson's hawks leave their breeding territories by late August.

The site is within the nesting range of Swainson's hawks and the CNDDDB (2019) contains several records of nesting Swainson's hawks near the greater project vicinity (Attachment B). There are several occurrences of nesting Swainson's hawks in the CNDDDB (2019) search area is within a mile of the site.

Large trees in and near the site could be used by nesting Swainson's hawks and the grasslands and croplands in the site provide suitable foraging habitat for this species. The quality of foraging habitat in the Sanchez Parcel varies over time with the planted crops and the foraging habitat in the Hoggan Parcel varies over time with periodic disking and/or mowing.

The project is expected to participate in the San Joaquin County Multi-Species Habitat Conservation and Open Space Plan (HCP) (SJCOG, 2000). The HCP involves payment of fees and compliance with standard Incidental Take Minimization Measures (ITMMs) that will be issued for the project. Pursuant to the HCP, if construction is scheduled to commence during the nesting season (i.e., between February 15 through August 31), and Swainson's hawks are nesting in or near the site, a construction setback of twice the diameter of the drip-line of the nest tree (as measured from under the nest) would be required until nesting is complete.

BURROWING OWL: The Migratory Bird Treaty Act and Fish and Game Code of California protect burrowing owls year-round, as well as their nests during the nesting season (February 1 through August 31). Burrowing owls are a year-long resident in a variety of grasslands as well as scrub lands that have a low density of trees and shrubs with low growing vegetation; burrowing owls that nest in the Central Valley may winter elsewhere.

The primary habitat requirement of the burrowing owl is small mammal burrows for nesting. The owl usually nests in abandoned ground squirrel burrows,

although they have been known to dig their own burrows in softer soils. In urban areas, burrowing owls often utilize artificial burrows including pipes, culverts, and piles of concrete pieces. This semi-colonial owl breeds from March through August, and is most active while hunting during dawn and dusk.

No ground squirrels or ground squirrel burrows were observed in either the Hoggan Parcel or Sanchez Parcel during any of the surveys. While there are currently no burrows in the site, burrowing owls are widespread in this part of Stockton and may nest in the site if burrow habitat becomes available in the future. The nearest occurrence of nesting burrowing owls in the CNDDDB (2019) search area is within approximately 1 mile south of the Sanchez Parcel.

Pursuant to the San Joaquin County Multi-species Habitat Conservation Plan, if construction is scheduled to commence outside the nesting season (i.e., if construction starts between September 1 and January 31) and burrowing owls are present on-site, they can be passively relocated. In the event that construction commences during the nesting season and burrowing owls are present on-site, a 250-foot construction setback from the natal burrow would be required until nesting is complete.

WHITE-TAILED KITE: White-tailed kite is a State of California Species of Concern, but is not a listed species at the state or federal level. The Migratory Bird Treaty Act and Fish and Game Code protect white-tailed kite year-round, as well as their nests during nesting season; nesting for this species peaks from May to August. White-tailed kites can be found in a variety of habitats across California including grasslands, open woodlands, riparian areas, marshes and cultivated fields. Populations of white-tailed kites are concentrated in the Central Valley, but their range spans west of the Sierra Nevada's to the California coastline.

White-tailed kite may nest in large trees along North Littlejohns Creek or other large trees near the site and may forage in grasslands or croplands in the site. Nesting usually commences in the early-spring, concurrent with other resident

Central Valley raptors, and most young fledge by early-July. The nearest occurrence of white-tailed kite in the CNDDDB (2019) search area is approximately 3.5 miles northwest of the site.

Pursuant to the HCP, if construction is scheduled to commence during the nesting season (i.e., between February 15 through September 15), and white-tailed kites are nesting in or near the site, a construction setback of a 100-foot construction setback from the nest would be required until nesting is complete.

GIANT GARTER SNAKE: The giant garter snake is listed as threatened both under FESA and CESA. Critical habitat has not been designated for this species; a draft recovery plan for giant garter snake was prepared (USFWS, 1999), but has not been finalized. Giant garter snake is endemic to the Sacramento and San Joaquin valleys where it is found in lowland areas (USFWS, 1999; 2017). Historically, this species was found throughout the Central Valley from Butte County in the north to Kern County in the south. Currently, giant garter snake is only known to occur in 9 discrete populations in the Sacramento and San Joaquin valleys in Butte, Colusa, Contra Costa, Fresno, Glenn, Merced, Sacramento, San Joaquin, Solano, Stanislaus, Sutter, and Yolo counties (USFWS, 2017).

The giant garter snake is one of the most aquatic of garter snakes and is usually found in streams, marshes, and sloughs with mud bottoms. This species prefers slow moving waters with emergent herbaceous wetland vegetation for cover and foraging, and grassy banks and openings for basking (Hansen, 1988). Giant garter snakes feed primarily on small fishes, tadpoles, and frogs. Since they are aquatic hunters, they must have access to permanent, though not necessarily extensive, water.

Giant garter snake is apparently absent from large rivers, other water bodies that support introduced populations of large predatory fish, and from wetlands with sand, gravel or rock substrates (Rossman and Stewart, 1987; Brode 1988; G.

Hansen, 1988). Historically, oxbows, overflow areas, and backwater sloughs or channels could have provided suitable habitat. Riparian woodlands do not typically provide suitable habitat because of excessive shade, lack of basking sites, and the absence of prey populations.

Essential habitat components of giant garter snake consist of: (1) adequate water during the snake's active season (early-spring through mid-fall) to provide food and cover; (2) emergent, herbaceous wetland vegetation, such as cattails and bulrushes, for escape cover and foraging habitat during the active season; (3) grassy banks and openings in waterside vegetation for basking; and (4) higher elevation uplands for cover and refuge from flood waters during the snake's dormant season in the winter; giant garter snakes inhabit small mammal burrows and other soil crevices for aestivation.

The project site does not provide the aquatic habitat required by giant garter snake due to its intermittent nature. Additionally, the grasslands and croplands in the site are highly disturbed. Neither of these uplands habitat types provide high quality aestivation habitat for giant garter snake. The nearest occurrence of giant garter snake in the CNDDDB (2019) search area is approximately 5.5 miles northwest of the project site.

Pursuant to the HCP, North Littlejohns Creek is considered "potential habitat" for giant garter snake, triggering an automatic "no construction" buffer extending 200 feet from the centerline of the creek, unless a buffer reduction is granted by SJCOG. In October 2018, NorCal Logistics requested a buffer reduction along the Hoggan frontage on North Littlejohns Creek from 200 feet to 50 feet (Attachment D). The buffer reduction was granted by SJCOG during their December 2018 meeting. Standard ITMMs related to preconstruction surveys for giant garter snake will still be required.

WESTERN POND TURTLE: The western pond turtle is a state species of concern, but is not a listed species at the state or federal level. Western pond turtles are

associated with permanent or nearly permanent bodies of water with adequate basking sites such as logs, rocks or open mud banks. Pond turtles construct nests in sandy banks along slow moving streams and ponds in the spring and the young usually hatch in 2 to 3 months. There are no records of western pond turtle in the CNDDDB (2019) search area.

Weber Slough and North Littlejohns Creek do not have suitable aquatic features that western pond turtle requires; Weber Slough is ephemeral and North Littlejohns Creek is intermittent. Weber Slough and North Littlejohns Creek are surrounded by cultivated cropland and highly disturbed grasslands, respectively, that do not provide suitable nesting habitat for this species.

Pursuant to the HCP, North Littlejohns Creek is considered “potential habitat” for western pond turtle, triggering an automatic “no construction” buffer extending 300 feet from the centerline of the creek, unless a buffer reduction is granted by SJCOG. In October 2018, NorCal Logistics requested a buffer reduction along the Hoggan frontage on North Littlejohns Creek from 300 feet to 50 feet, concurrent with the GGS buffer reduction request (Attachment D). The western pond turtle buffer was also granted by SJCOG during their Decemer 2018 meeting. Standard ITMMs related to preconstruction surveys for western pond turtle will still be required, and temporary construction setbacks from nests will be implemented in the event active nests are located.

OTHER SPECIAL-STATUS SPECIES: The site does not provide highly suitable habitat for other special-status wildlife species. Other special-status birds, such as loggerhead shrike, may fly over the area on occasion, but few, if any, would be expected to use on-site habitats on more than an occasional or transitory basis, primarily due to lack of habitat. The riparian corridor along North Littlejohns Creek does not contain expansive stands of emergent wetland vegetation that would provide suitable nesting habitat for species such as tricolored blackbird, least-bell’s vireo or yellow-headed blackbird.

There is no well-developed riparian forest vegetation required for riparian brush rabbit; there is no expansive scrub-shrub vegetation to support this species. The site does not provide suitable aquatic habitat for any species of fish, California red-legged frog, California tiger salamander, or western pond turtle. There are no vernal pools or seasonal wetlands in the site for vernal pool branchiopods (i.e., fairy and tadpole shrimp). There are no blue elderberry shrubs in the site, precluding the potential occurrence of valley elderberry longhorn beetle.

CRITICAL HABITAT: The site is not within designated critical habitat for California red-legged frog (USFWS, 2006), California tiger salamander (USFWS, 2005a), federally listed vernal pool shrimp or plants (USFWS, 2005b), delta smelt (USFWS, 1994), valley elderberry longhorn beetle (USFWS, 1980), Central Valley steelhead (NOAA, 2005), or any other federally listed species (Attachment E).

Conclusions and Recommendations

- The majority of the site consists of cultivated cropland and open fields vegetated in upland grasses and weeds that are periodically disked and/or mowed. On-site habitats are biologically unremarkable.
- Weber Slough and North Littlejohns Creek are the only potentially jurisdictional Waters of the U.S. or wetlands in the site. No other potential jurisdictional Waters of the U.S. or wetlands of any type were observed in the site.
- Avoidance of jurisdictional Waters of the U.S. is recommended, to the maximum extent practicable. Widening Austin Road will involve filling the portion of Weber Slough that runs parallel to the road. The project will also involve construction of a storm drain outfall on Weber Slough. Permits from ACOE, CDFW,

and RWQCB will be needed prior to the placement of any fill material (e.g., culverts, fill dirt, rock) within Weber Slough. As the estimated fill in Waters of the U.S. is less than 0.2 acres, the work would be authorized by ACOE under a Nationwide Permit (NWP).

- Development of the annual grassland and cropland portions of the project site will result in a loss of Swainson's hawk foraging habitat, and will contribute to a cumulative loss of Open Space and associated biological resource values. Mitigation for the loss of Open Space is expected to be accomplished through participation in the San Joaquin County Multi-species Habitat Conservation Plan (SJCOG, 2000). The site is located in an area that is pre-approved for inclusion in the Habitat Conservation Plan (HCP).
- With the exception of Swainson's hawk, burrowing owl, and white-tailed kite, no special-status wildlife species are expected to occur in the body of the site on more than a very occasional or transitory basis. Swainson's hawk and white-tailed kite could potentially nest in trees in or near the site and may use the grasslands in the site for foraging. Burrowing owls could nest in the site if burrow habitat is available.
- Since the project is participating in the HCP, standard Take Avoidance measures outlined in the HCP for nesting Swainson's hawks and burrowing owl will be required. These will include pre-construction surveys for nesting Swainson's hawks within 0.5 miles of the site for construction activities between March 1 and September 15 and pre-construction surveys for nesting burrowing owls within 250 feet of the site for construction activities between February 1 through August 31. If active nests

are found, temporal restrictions on construction may be required.

- Due to a lack of suitable habitat, giant garter snake and western pond turtle are not expected to occur in the site. Nevertheless, standard Take Avoidance measures for these species outlined in the HCP, primarily consisting of pre-construction surveys, are expected to be included in the ITMMs.
- Trees and grasslands in the site could be used by birds protected by the Migratory Bird Treaty Act of 1918 and/or Fish and Game Code of California. If vegetation removal or construction commences during the general avian nesting season (March 1 through July 31), a pre-construction survey for all species of nesting birds is recommended. If active nests are found, work in the vicinity of the nests should be delayed until the young fledge.
- The site is not within designated critical habitat for any federally listed species.

We hope this information is useful. Please call me at (209) 745-1159 with any questions.

Sincerely,

Diane S. Moore, M.S.
Principal Biologist

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

San Joaquin County, California

Local office

Sacramento Fish And Wildlife Office

☎ (916) 414-6600

📅 (916) 414-6713

Federal Building
2800 Cottage Way, Room W-2605
Sacramento, CA 95825-1846

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population, even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information.
2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME

STATUS

Riparian Brush Rabbit *Sylvilagus bachmani riparius* Endangered
No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/6189>

Reptiles

NAME	STATUS
Giant Garter Snake <i>Thamnophis gigas</i> No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4482	Threatened

Amphibians

NAME	STATUS
California Red-legged Frog <i>Rana draytonii</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/2891	Threatened
California Tiger Salamander <i>Ambystoma californiense</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/2076	Threatened

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
------	--------

Vernal Pool Fairy Shrimp *Branchinecta lynchi* Threatened
There is **final** critical habitat for this species. Your location is outside the critical habitat.
<https://ecos.fws.gov/ecp/species/498>

Vernal Pool Tadpole Shrimp *Lepidurus packardii* Endangered
There is **final** critical habitat for this species. Your location is outside the critical habitat.
<https://ecos.fws.gov/ecp/species/2246>

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

THERE ARE NO CRITICAL HABITATS AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>
- Measures for avoiding and minimizing impacts to birds <http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>
- Nationwide conservation measures for birds <http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip:

enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)
Burrowing Owl <i>Athene cunicularia</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9737	Breeds Mar 15 to Aug 31
Common Yellowthroat <i>Geothlypis trichas sinuosa</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/2084	Breeds May 20 to Jul 31
Nuttall's Woodpecker <i>Picoides nuttallii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9410	Breeds Apr 1 to Jul 20
Oak Titmouse <i>Baeolophus inornatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9656	Breeds Mar 15 to Jul 15
Song Sparrow <i>Melospiza melodia</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Feb 20 to Sep 5

Spotted Towhee *Pipilo maculatus clementae*

Breeds Apr 15 to Jul 20

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/4243>

Wrentit *Chamaea fasciata*

Breeds Mar 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Yellow-billed Magpie *Pica nuttalli*

Breeds Apr 1 to Jul 31

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9726>

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) and/or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [E-bird Explore Data Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

This location overlaps the following wetlands:

FRESHWATER EMERGENT WETLAND

[PEM1Cx](#)

[PEM1C](#)

[PEM1A](#)

[PEM1Ah](#)

FRESHWATER POND

[PUSCh](#)

[PUBFx](#)

RIVERINE

[R5UBFx](#)

[R4SBC](#)

A full description for each wetland code can be found at the [National Wetlands Inventory website](#)

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

HCP Buffer Reduction Staff Report

STAFF REPORT

SUBJECT: NorCal Logistics Project, Buffer Reduction

RECOMMENDED ACTION: Motion to Approve Recommendation to SJCOG, Inc. to Allow a Revision to the Incidental Take Minimization Measures for Giant Garter Snake (GGS) and Western Pond Turtle (WPT) Buffers

DISCUSSION:

SUMMARY:

The project applicant, NorCal Logistics, is requesting coverage under the San Joaquin Multi-Species Habitat Conservation and Open Space Plan (SJMSCP). Although the project is in a mapped area of the plan, the project seeks approval to reduce the buffers for certain SJMSCP covered species. The project is located east of State Route 99 and north of Arch Road, within the city limits of Stockton in the Central Zone (attachments 1 & 2).

RECOMMENDATION:

SJCOG, Inc. staff recommends the HTAC make the recommendation to the SJCOG, Inc. Board to:

- allow a revision to the Incidental Take Minimization Measures for Giant Garter Snake (GGS) and Western Pond Turtle (WPT) buffers

FISCAL IMPACT:

If approved, SJCOG, Inc. will be provided mitigation for the project impacts as required under the SJMSCP for approximately 20 acres at the appropriate rate at the time of disturbance under the Plan. The impacts for this project would consist of:

- 20.0 acres of Agricultural (C34) habitat land

BACKGROUND:

The project site will consist of an approximate 20-acre site providing a warehouse-type structure and additional trailer storage for the large building anticipated on the adjacent parcel (attachment 3).

To construct the warehouse-type structure and associated infrastructure, the project will impact Giant Garter Snake (GGS) habitat within the suggested 200-foot buffer and Western Pond Turtle (WPT) habitat within the 300-foot buffer. As identified in Section 5.59 of the Plan, HTAC, on a case by case review, can establish a setback and buffer zone to be used by a project in place of the 200 and 300 feet suggested. This, however, does not allow the project to take the GGS or WPT.

Because construction of portions of the project will be within the suggested 200-foot and 300-foot buffer areas, the project proponent has requested a reduction in the buffer to a 50-foot setback for the construction of the warehouse and trailer parking site impacts along the south side of Little Johns Creek. The reduction of these buffers is necessary for the construction of this project. Reducing the buffer for GGS and WPT will allow the project to construct up to 50 feet of Little Johns Creek during the species' active period. However, the project will be required to meet all other ITMM measures for GGS and WPT, such as biological surveying efforts, constructing within the standard May 1 to October 1 active period and mitigating for project impacts.

The SJMSCP GIS habitat layer classifies the project site as Agricultural (C34) habitat.

If allowed to participate in the SJMSCP, the total disturbed area will consist of 20.0 acres of Agricultural (C34) habitat impacts. The project applicant will be responsible for mitigating for the habitat impacts that is consumed by this project by either paying the appropriate fees at the time of ground disturbance or dedicating land in lieu of a fee at the appropriate SJMSCP ratio.

Adjacent Vegetation and Land Use

Location	SJMSCP Vegetation Map Classification	Habitat Type Category	Actual Use Of Property
Site	Agriculture (C34)	Agriculture (C34)	Agriculture (C34)

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-SQG sites within approximately 1.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 1.25 miles of the target property.

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 10/24/2018 has revealed that there are 49 CHMIRS sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that

EXECUTIVE SUMMARY

there is 1 RCRA NonGen / NLR site within approximately 1.25 miles of the target property.

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 02/01/2019 has revealed that there is 1 RMP site within approximately 1 mile of the target property.

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 11/18/2016 has revealed that there is 1 ICIS site within approximately 1 mile of the target property.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, has revealed that there is 1 FTTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there is 1 HIST FTTS site within approximately 1 mile of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there is 1 US AIRS site within approximately 1 mile of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/15/2019 has revealed that there are 63 FINDS sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 90 HAZNET sites within approximately 1 mile of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/22/2018 has revealed that there are 30 CERS sites within approximately 1 mile of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there is 1 RGA LUST site within approximately 1 mile of the target property.

Site ID: 404943
CERS ID: 10187549
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 404943
Site Name: UNITED FACILITIES
Violation Date: 07-17-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 12/01/2017. 220 gallons waste oil, 55 gallons waste antifreeze, 55 gallons motor oil were found on site that have not been reported. Any material that meets or exceeds the reportable quantity shall be reported in the facility's business plan. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, add the materials to the hazardous material inventory, and submit to the EHD for approval.

Violation Division: San Joaquin County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-17-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 8/16/2017. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

reportable quantity shall be reported in the facility's business plan. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, add the materials to the hazardous material inventory, and submit to the EHD for approval.

Violation Division: San Joaquin County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-17-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 8/16/2017. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Violations:
 Site ID: 133204
 Site Name: MARTIN-BROWER CO
 Violation Date: 07-06-2015
 Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
 Violation Description: Failure to test or inspect aboveground tanks for integrity by a person qualified in accordance with industry standards.
 Violation Notes: Returned to compliance on 02/09/2018. STI SP001 integrity test results were not available on site for the two 10,000 gallon diesel tanks. According to the SPCC Plan, these tanks are inspected for integrity every 20 years. Each aboveground container shall be tested and inspected for integrity on a regular schedule and whenever repairs are made. The qualifications of personnel performing tests and inspections, frequency and type of testing and inspections that take into account container size, configuration, and design shall be determined in accordance with industry standards. Examples of these integrity tests include, but are not limited to: visual inspection, hydrostatic testing, radiographic testing, ultrasonic testing,

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to provide training regarding: 1. The operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. AND 5. The contents of the SPCC Plan.

Violation Notes: Returned to compliance on 07/29/2015. Oil handling personnel were not trained in accordance with the SPCC Plan. At a minimum, oil handling personnel shall be trained in the operation and maintenance of equipment to prevent discharges; discharge procedure protocols; applicable pollution control laws, rules, and regulations; general facility operations; and the contents of the Spill Prevention, Control, and Countermeasure Plan. Immediately provide this training to all oil handling personnel and submit a copy of the training log to the EHD.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to make SPCC plan amendment(s) when the facility has had a change in: design, construction, operation, or maintenance which affects the facility s discharge potential.

Violation Notes: Returned to compliance on 07/29/2015. According to the SPCC Plan, filters are located inside the storm drains around the diesel tanks; no filters were observed in the tanks. The Spill Prevention, Control, and Countermeasure (SPCC) Plan must be amended when there is a change in the facility design, construction, operation, or maintenance that materially affects its potential for a discharge, within 6 months of the change, and implemented as soon as possible, not later than 6 months following preparation of the amendment. Immediately make all necessary amendments to the SPCC Plan to accurately represent the procedures and policies currently in place at the facility.

Violation Description: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.

Violation Notes: Returned to compliance on 07/29/2015. Copies of inspection and testing records for the SPCC Plan were not found on site. Inspections and tests must be conducted in accordance with the written procedures developed in the Spill Prevention, Control, and Countermeasure (SPCC) Plan. Records of these inspections and tests must be signed by the appropriate supervisor or inspector and kept on site with the SPCC Plan for a period of three years. Immediately locate a copy of all inspection and testing records for the last three years, maintain them on site, and submit copies to the EHD.

Evaluation:
 Eval General Type: Compliance Evaluation Inspection
 Eval Date: 02-10-2016
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes: All violations have been corrected on site. There are four generators on site that have not been installed yet. Each generator has a fuel tank that the machines sit on. Once the generators are installed please identify each location on the site map. You will also need to add to the inventory with the correct amount of diesel for each generator. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-10-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: All violations have been corrected on site. There are four generators on site that have no been installed yet. Each generator has a fuel tank that the machines sits on. Once the generators are installed please identify each locations on the site map. You will also need to add to the inventory with the correct amount of diesel for each generator. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Violation Description: Failure to test or inspect aboveground tanks for integrity by a person qualified in accordance with industry standards.

Violation Notes: Returned to compliance on 02/09/2018. STI SP001 integrity test results were not available on site for the two 10,000 gallon diesel tanks. According to the SPCC Plan, these tanks are inspected for integrity every 20 years. Each aboveground container shall be tested and inspected for integrity on a regular schedule and whenever repairs are made. The qualifications of personnel performing tests and inspections, frequency and type of testing and inspections that take into account container size, configuration, and design shall be determined in accordance with industry standards. Examples of these integrity tests include, but are not limited to: visual inspection, hydrostatic testing, radiographic testing, ultrasonic testing, acoustic emissions testing, or other systems of non-destructive testing. Comparison records and other records of inspections and tests must be maintained on site. Immediately conduct the necessary testing and submit a copy of the test results to the EHD, or provide equivalence as allowed by [Truncated]

Violation Description: 6.67, Section(s) 25270.4.5(a)
Failure to make SPCC plan amendment(s) when the facility has had a change in: design, construction, operation, or maintenance which affects the facility s discharge potential.

Violation Notes: Returned to compliance on 07/29/2015. According to the SPCC Plan, filters are located inside the storm drains around the diesel tanks; no filters were observed in the tanks. The Spill Prevention, Control, and Countermeasure (SPCC) Plan must be amended when there is a change in the facility design, construction, operation, or maintenance that materially affects its potential for a discharge, within 6 months of the change, and implemented as soon as possible, not later than 6 months following preparation of the amendment. Immediately make all necessary amendments to the SPCC Plan to accurately represent the procedures and policies currently in place at the facility.

Violation Notes: manifest, or bills of lading copies for three years. Returned to compliance on 09/08/2015. Manifest numbers 004475231JJK (11/20/13) and 004696569SKS (2/19/15) were found without a signed off copy from the destination facility. Manifest number 006590137FLE (9/16/13) was not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the destination facility on site for three years and have them readily available for review. If the generator did not receive a copy of the manifest with the handwritten signature of the owner or operator of the facility to which the generator s waste was submitted within 60 days of the date the waste was accepted by the initial transporter, the generator shall submit a legible copy of the missing manifest, with some indication that the generator has not received confirmation of delivery. This information shall be submitted to: DTSC Report Repository Generator Information Services Section P.O. Box 806 Sacramento, CA 95812-0806 Immediately locate a copy of the missing manifests or [Truncated]

Violation Division: San Joaquin County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-10-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: All violations have been corrected on site. There are four generators on site that have no been installed yet. Each generator has a fuel tank that the machines sits on. Once the generators are installed please identify each locations on the site map. You will also need to add to the inventory with the correct amount of diesel for each generator. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Eval Division: San Joaquin County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-06-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by August 5, 2015, 30 days from now. Please be aware as of January 1, 2013, all businesses are required to submit all new (or any changes to existing) Aboveground Petroleum Storage Act (APSA) information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov> in addition to any other relevant activities and required fields. No later than January 1, 2014, all APSA data must be entered and or updated in CERS. Provided: Return to Compliance Certification form

Eval Date: 06-01-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: No violations were noted at the time of the inspection. This inspection also was part of the evaluation review as part of the RMP submittal review. Comments were not received during the formal public review period. . Notes: Upon reviewing the 5 years process hazard analysis (PHA)/ hazard review records that was conducted on May 26& 27 2015, the PHA has thirty six recommendations, and eight recommendations are still open. The open recommendations are dated for 09/20/2017 to be completed. All recommendations from the hazard review/process hazard analysis must be completed within one year from the date of the hazard review/process hazard analysis. If more time is required, our department must be notified in writing to request an extension for up to 2.5 years. The next PHA revalidation is due by May 26, 2020. Please send an invitation to our department to participate. Upon reviewing the three-year compliance audit from June 11, 2015, sixteen observations & findings were [Truncated]

Inspection and taking photos were granted by the Maintenance Manager, Bob Martin. Inspection was facilitated by Bob Martin, Casey Hays (Distribution Process Manager), and Kevin Hansen (Consultant with KRH engineering). There were no violations at the time of the inspection. Please refer to the 001 inspection report for the Notes for this inspection. Inspection report was discussed with all the team mentioned above, and the General Manager, Kevin Pelletier. A copy of the inspection report was emailed to all the team member. A copy of the inspection report was emailed to Yvonne Moreno to be emailed to the Property Owner, and copied Muni and Ray in the email.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

- . Waste code: 331
- . Waste name: Off-specification, aged, or surplus organics

- . Waste code: 791
- . Waste name: Liquids with pH < 2

- . Waste code: 792
- . Waste name: Liquids with pH < 2 with metals

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

- . Waste code: D003
- . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Business type: C
Preparer other function: Not reported

Description of Events:

The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the Fire Extinguisher(s) had a loose pin(s) with allowed leakage. The pin(s) were secured. The package was repacked for return to shipper.

Shipper Details:

Shipper ID: 427463
Shipper name: systems mateial handling
Address: 3519 grapevine
MIRA LOMA, CA 91752
Shipper country: US
Hazmat papers #: 29356330013353
Shipment origin: Not reported
Not reported
Shipment origin country: US

Details of material being shipped:

Material ID: 433502
Material name: FIRE EXTINGUISHERS containing compressed or liquefied gas
UN ID: UN1044
Hazard class code: 22
Trade name: Not reported
Packing group: Not reported
Amount reported released: 5 Pound(s)
Amount released: 5 Pound(s)
Material listed as hazardous waste: False
EPA manifest number of haz. waste: Not reported
Material listed as toxic inhalant: False
Hazard zone of toxic inhalant: Not reported
Material shipped under exemption/ approval/ Competent Authority Cert. False
Exemption/approval/CAC number: Not reported
Undeclared Hazmat shipment: False
Package ID: 433917
Hazmat shipment destination: 531 bitritto way
MODESTO, CA 95356
Package type: A

Preparer of Incident Report: Carrier
Description of Events: The package was unloaded with leakage noted on the box. Examination of the inner container revealed that the container(s) had loose cap(s) and leaked. The leakage was contained. The cap(s) were secured. The carton was wet but otherwise undamaged. The undamaged portion of the package was repacked for return to shipper.

Employer business name: Fedex Ground Package System, Inc.
Address: 1000 Fedex Drive
MOON TOWNSHIP, PA 15108
Country: US
Report date: 07/16/08
Telephone: 412-859-5061
Fax: 412-859-5045
Business type: C
Preparer other function: Not reported

Description of Events:

The package was dropped in handling. Examination of the inner container revealed a ruptured seam which allowed the contents to escape. The leakage was contained. The undamaged portion of the package was repacked for return to shipper.

Description of Events:

The package was dropped in handling. Examination of the inner container revealed a ruptured seam which allowed the contents to escape. The leakage was contained. The undamaged portion of the package was repacked for return to shipper.

 Agency Type: Private
 SIC Code: 2821
 SIC Code 2: Not reported
 Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
 Primary Waste: STORMS
 Waste Type2: Not reported
 Waste2: Stormwater Runoff
 Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID: 155590
Site Name: SOUTHWEST TRADERS INC
Violation Date: 12-28-2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95,
Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the
business plan is complete and accurate on or before the annual due
date.
Violation Notes: Returned to compliance on 12/28/2016. The business plan information
has not been reviewed and resubmitted in the California Environmental
Reporting System (CERS) annually. The last submittal was made
1/16/2014. The hazardous materials inventory shall be submitted by
January 15 of each calendar year and may be submitted beginning
November 1 of the previous year. This violation has been corrected on
site.
Violation Division: San Joaquin County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 155590
Site Name: SOUTHWEST TRADERS INC
Violation Date: 12-28-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter
6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material
inventory information for all reportable hazardous materials on site
at or above reportable quantities.
Violation Notes: Returned to compliance on 12/28/2016. 96 gallons of bleach were found
on site that have not been reported. Any material that meets or
exceeds the reportable quantity shall be reported in the facility's
business plan. This violation has been corrected on site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Source: CERS

Site ID: 24159
Site Name: DBI BEVERAGE INC
Violation Date: 08-18-2015
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)

Violation Description: Failure to post, next to the telephone, Emergency Information (SQG) containing the location of emergency equipment, contact names and numbers.

Violation Notes: Returned to compliance on 09/17/2015. An emergency coordinator and modified contingency plan information is lacking. There must be at least one emergency coordinator on site or on call to coordinate emergency response measures, and the following information must be posted by a phone: the name and phone number of the emergency coordinator; location of fire extinguishers, spill control equipment, and if present, fire alarm; and the phone number of the fire department, unless the facility has a direct alarm. Immediately appoint an emergency coordinator and post the required information by a phone. A form is provided that can be used for this purpose.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-07-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 9/6/2017. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110064601319

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
